Achal Kolhe

Salesforce Developer

Dedicated Salesforce Developer with 1 year of experience, adept at implementing Salesforce solutions tailored to business needs. Proficient in Visualforce, Apex, Lightning Web Components, and various Salesforce tools. Seeking a challenging role in a dynamic company that fosters creativity and offers opportunities for career advancement.

Experience

May 10, 2023 - November 10, 2023

Percept Infosystem - Consultants

Salesforce Developer Intern

- Developed and maintained Salesforce solutions, ensuring alignment with business requirements and best practices.
- Integrated Salesforce with external systems, enhancing data flow and process efficiency.
- Implemented various triggers, data validation rules, and batch classes to automate processes and enforce data integrity.
- Utilized Apex, Visualforce, Lightning, and other technologies to build custom solutions tailored to organizational needs.
- Designed and implemented custom reports, dashboards, objects, fields, and relationships to optimize data management and decision-making.
- Enhanced communication skills through regular project updates and reporting.
- Contributed to the development of transformative projects such as the Student Management System and BMI Calculator.
- Implemented and managed Salesforce security features to safeguard data and enforce access controls effectively.

Relevant Projects

Alarm Clock Using LWC:

- Built an alarm clock web application using Lightning Web Components.
- Enabled users to set alarms and manage them with sound alerts.
- Implemented features for resetting alarms and clearing alarm history.

Property Management Application:

- Developed a Property Management application using Salesforce, Apex, and Visualforce.
- Integrated with Authorize.net for payment processing via REST web services.
- Created Visualforce pages for capturing renter information and payment details.
- Implemented Apex classes to facilitate communication with Authorize.net and handle responses.
