EXPERIENCE

Nakoda Enterprises - Havmor Ice Cream Distributor

Bhilwara
(Aug'24 - Present)

Full Stack Engineer

- Built a real-time Vendor Management System using PHP.
- Crafted a modern classic UI with 3D-inspired design elements to improve user engagement.
- Created an android webview app of the company dms website using Flutter, enabling staff to access the dms website in a click.

Performance Marketing

- Managed Google Ads campaigns by targeting corporate clients in Bhilwara City, achieving a 20% growth in new vendor acquisition.

Sangam India

Bhilwara
(Mar'24 - Jul'24)

SAP ERP

- Specialized in verifying and entering material data into the SAP system, ensuring data accuracy and integrity.
- Managed the creation of new vendors and customers, ensuring all details were up to date and preventing data duplication by extending vendor to customer and vice versa when required.

Full Stack Engineer

- Designed and implemented a real-time Canteen Management System using Node.js and MSSQL, ensuring data is fetched in real-time from the punching machine.
- Collaborated with an external Google team to create and manage over 100 integrated Google Sheets for the Manager, optimizing workflow and enhancing collaboration across teams.

Digital Crafters (USA) - Internship

Remote
(Jun'23 - Sep'23)

Cyber Security

- Conducted continuous threat analysis, designed and implemented security architectures, and created incident response plans ensuring compliance with security regulations and standards.
- Monitored security tools and technologies, setting up systems for real-time threat detection and response.

Full Stack Engineer

- Encompassed front-end programming, where I designed user-friendly interfaces and handled back-end programming, ensuring server-side functionality, data management, and server security.
- Collaborated with content management systems like WordPress, performed testing, and maintained version control to deliver responsive, secure websites.

Take2 Technologies - Internship

Bhilwara
(May'22 - Jan'23)

Learning Management Systems

- Acquired knowledge in Learning Management Systems (LMS), with a strong focus on platforms such as Moodle and Iomad.
- Applied my expertise in LMS technologies to create effective solutions for clients, ensuring efficient learning environments.

Full Stack Engineer

- Managed the company's website with a focus on SEO to improve visibility and performance. Ensured site functionality and content updates.

PROJECT EXPERIENCE

Website Vulnerability

Bhilwara
(Feb'25 - Present)

- **Burke & Herbert Bank (USA)** – Performed ethical vulnerability assessment and discovered issues including brute force attacks, mass user password reset email and DDOS Attack.
- **CFSB - Banking Provider (USA)** – Found critical vulnerabilities on the official website and collaborated with their cybersecurity team leader Mr.Chris to resolve the issue, ensuring better protection against future threats.
- **Uni Care Dubai** - Official website, has a critical admin login bypass vulnerability allowing anyone to login as admin. After login they can perform all the actions of admin. The issue has been reported to the authorities.
