Profile

I am a motivated Salesforce Developer with hands-on experience in developing scalable and efficient solutions on the Salesforce platform. I have strong practical knowledge of Apex, Lightning Web Components (LWC), Flow Builder, Triggers, and SOQL, with a focus on bulkification and governor limit best practices.

I am passionate about learning new Salesforce features, improving existing implementations, and solving real-world business problems. I am actively looking for opportunities as a Salesforce Developer where I can contribute my skills, grow professionally, and add value to the organization.

Professional Experience (Fresher)

- Actively learning and practicing Salesforce CRM development in a Developer Org environment.
- Gained hands-on experience with standard and custom objects, fields, page layouts, and record types.
- Practiced Apex programming including basic triggers and SOQL queries.
- Worked with Flow Builder to understand automation concepts.
- Developed understanding of data modeling, relationships (Lookup & Master-Detail), and security model.
- Earned **50,000+ Trailhead points** with multiple badges in Salesforce Administration and Development.
- Strong understanding of Governor Limits and Salesforce best practices.
