PROFILE

I have over one year of experience as a Junior Engineer in Salesforce at Sopra Steria. Dedicated Junior Engineer with a year of immersive experience in Salesforce, specializing in the Salesforce Sales Cloud. Proficient in both administrative and developmental aspects. I am quick learner and ready to take on challenges to perform better.

PROFESSIONAL EXPERIENCE

Junior Engineer Trainee

Sopra Steria

01/2023 – 03/2024
Greater Noida, India

- Worked on an internal SFDC project in Sales Cloud. Gathered the PO's requirements, providing them with best services and implemented solutions designs in Apex, flows, and Lightning components, etc. and conducted testing.
- Developed engineering knowledge and skills by observing colleagues, attending training and practice.
- I explored working in configuration and customization in the Sales Cloud, where configuration includes working with the Lightning Experience platform, standard and custom objects, flows, profiles, users, fields, relationships, validation rules, tabs, record types, dynamic forms, custom metadata types, page layouts, workflows, duplicate rules, restriction rules, permission sets, and list views. In terms of customization, I have in-depth knowledge of Apex, Lightning Web Component, SOQL, SOSL, and Triggers.
- During my training session, I completed the Javascript from FreeCodeCamp.

Key Responsibilities:

• Requirement Gathering

Collaborate with business analysts/users and other stakeholders to gather and understand requirements for Salesforce-based solutions.

• Authorisation

Provide access to records(data) to particular roles or groups or individual users.

• Lightning Web Component Development

Design, develop, and implement Lightning Web Components (LWC) and APEX Classes to enhance and customize Salesforce functionalities. Adhere to the standard Salesforce Coding Best Practices.

• Solution Design

Create technical designs for LWC solutions, ensuring they align with best practices and Salesforce architecture standards.

• Customization

Customize Salesforce components, including objects, fields, page layouts, record types, validation rules, and workflows, to meet specific business requirements

• Resolved Customers Queries

I worked in the Salesforce support team where I had to resolve the customers' queries related to Salesforce.

• Testing and Quality Assurance

Develop and execute test cases, perform unit testing, and ensure the quality and stability of LWC solutions.

• Performance Optimization

Optimize the performance of LWC components and troubleshoot issues when necessary.

• Security

Implement and maintain security best practices within the Salesforce platform, ensuring data integrity and compliance with security standards.

SKILLS

- Salesforce Admin
- Apex Programming
- JavaScript
- SOQL & SOSL
- Object Oriented Programming Language
- C++
- Lightning Web Component
- Apex Triggers
- Flows

PROJECTS

SFDC Project

Worked on Salesforce Internal SFDC project. Mainly worked on Sales Cloud. Gathered the PO's requirements like generating more leads for the sale of products, closing more deals , providing them best services at scale and implementing solutions design in Apex, flows, and Lightning components, etc. and conducted testing

EDUCATION

Bachelor of Computer Applications

Bosco Technical Training Society
CGPA- 9.21

08/2019 – 07/2022
New Delhi, India

High School Graduation

Mata Gujri Public School
Class - XII (Non-Medical with Computer Science)
Percentage - 71.4%

02/2018 – 02/2019
New Delhi, India

ACHIEVEMENTS

- Successfully completed one year of internship in Salesforce technology.
- Developed new skills during my learning period like javascript, salesforce technology, good data analyzer and database skills.
- Completion of tasks efficiently and timely.
