PERSONAL DETAILS

Alwar, Rajasthan, 301001 Alwar
akm04aftab@gmail.com, +918619980643
Date of birth: April 21, 2004
Nationality: INDIAN
LinkedIn: [linkedin.com/in/aftab-khan-291747250](https://www.linkedin.com/in/aftab-khan-291747250)

PROFILE

I am currently a BTech Computer Science Engineering student at Amity University Rajasthan. I have a strong foundation in computer science concepts, including data structures, algorithms, and software development. I am actively expanding my skills in areas such as web development, artificial intelligence, and machine learning.

As a student, I thrive in environments where I can apply my academic knowledge to real-world projects. I've gained experience in languages like Java, Python, C++, and tools like HTML, CSS, JavaScript, and SQL.

Feel free to connect with me if you share similar interests or are looking for a motivated, adaptable individual eager to learn and grow in the tech industry!

EDUCATION

Bachelor of Technology – BTech, Computer Science
Amity University Rajasthan, Jaipur

Jul 2022 – Aug 2026

10+2, PCM
Kendriya Vidyalaya

Apr 2021 – Jul 2022

SKILLS

Pandas (Software)

MySQL

Python (Programming Language)

Artificial Intelligence (AI)

Databases

Data Engineering

Attention to Detail

Programming

Code Review

Problem Solving

Computer Science

Critical Thinking

Python (Programming Language), Java ,DBMS, C++,

PROJECTS

Social Media Analysis and Insights

Developed a sentiment analysis tool using Python and NLP to classify social media posts as Positive, Negative, or Neutral. Visualized key insights with pie charts and word clouds to highlight public opinion trends. Tools used include TextBlob, Pandas, Matplotlib, and WordCloud in Google Colab.

Student Performance Predictor for EduQuest Coaching

This project focuses on developing a machine learning model that predicts student academic performance based on various factors, including past academic records, attendance, engagement in coursework, and demographic information. .

INTERNSHIPS

Intern

Jun 2025 – Jul 2025

YBI Foundation

Built a sentiment analysis tool to classify social media posts using Python and NLP (TextBlob).

Visualized public opinion trends through pie charts and word clouds in Google Colab.

Gained hands-on experience with real-world datasets and data-driven decision making.

- Assisted in optimizing SQL queries which improved database retrieval times by 20%, contributing to overall system efficiency.
