EXPERIENCE

Infosys Ltd, Noida – Salesforce Developer

Dec 2023 – Present

End to End design from dev to deployment as per client requirements.

Using LWC, AURA for frontend design changes and use Apex, trigger and asynchronous for backend changes.

Used batch class to update the database to reduced the timing of backend server.

Using agile methodology for the process of deployment. VScode, gitlab, Jira used as tool for the project.

Accenture, Noida — Software Engineer (2.7)

April 2021 - Nov 2023

End to End flow from development to deployment in Salesforce project.

Tested functionality, Design, development, performed debugging using Apex, Aura, Trigger and LWC.

Experienced in data migration and integration between Salesforce and other systems using APIs.

Mentoring Junior Developer, code review and ensuring high quality code check and up to date with release of Salesforce upgrades.

Using Agile methodology for Salesforce development life cycle.

Connect with a manager to discuss the requirement and solution of Client for best solutions.

Design tools to check the quality of Customization in Salesforce to detects if it reached max limit.
