OBJECTIVE

I am a final-year BCA student passionate about creative and interactive frontend development and modern web technologies. With a strong foundation in Java, C++, and MERN stack, I enjoy designing engaging user experiences and solving problems through innovative web solutions. I aim to contribute my skills to dynamic teams focused on building impactful applications.

TECHNICAL SKILLS

- **Programming Languages:** Java, C++, Python, JavaScript, PHP
- **Web Development:** HTML, CSS, Tailwind CSS, React, Node.js
- **Frameworks & Libraries:** Redux, Axios, Three.js, GSAP, Bootstrap, jQuery
- **CRM & Cloud Platforms:** Salesforce, Firebase
- **Database Management:** MySQL, MongoDB
- **Tools & Platforms:** Git & GitHub, Salesforce Developer Tools, XAMPP, phpMyAdmin

PROJECTS

Hostel Management System

- Designed a web app using PHP with MVC architecture for managing room allocation, student tracking, and payments, helping a hostel with over 200 users streamline their processes.
- Created detailed analytics dashboards for tracking hostel occupancy rates and revenue generation trends.
- Built a desktop version in Java with a user-friendly interface to reduce manual administrative workload by 30%.

File Sharing System on Cloud

- Designed a React and Firebase platform for secure file uploads and management.
- Implemented a progress indicator for uploads, ensuring a smoother user experience.
- Optimized database queries to enhance system responsiveness, reducing load times by 20%.
- Added multi-user support with role-based access control to enhance usability in team settings.

E-commerce Website Prototype

- Built a responsive e-commerce platform with HTML, CSS, and JavaScript.
- Focused on delivering a visually appealing and user-friendly design for seamless navigation.

Interactive Blogging Platform

- Designed and implemented a dynamic blogging system using PHP and JavaScript.
- Created features for real-time post management and editing, prioritizing interactivity and usability.

Mini Projects

- Completed 40+ small projects focusing on creative user interfaces and backend functionality, including interactive dashboards, REST APIs, and responsive web apps.

EDUCATION & CERTIFICATIONS

- **Bachelor of Computer Applications (BCA)** - Star InfoTech College, Ajmer, Rajasthan (Expected Graduation: 2025)
- **Senior Secondary (12th Grade):** Government Senior Secondary School, Kishangarh – 2022
- **Secondary (10th Grade):** Government Senior Secondary School, Kishangarh – 2020
- **Frontend, Backend, and Three.js Domination** – Sheriyans Coding School
- **React Basics** – Sololearn
- **Web Development Essentials** – Coursera
- **SEO Foundations** – HubSpot Academy

INTERESTS

- Creative and interactive frontend development using modern libraries and frameworks
- Exploring new trends in responsive web design and UX optimization
- Building user-centric web applications with a focus on aesthetics and functionality
- Learning and experimenting with 3D effects in web design using Three.js
