Objective

B.Tech undergrad student with abilities in machine learning, predictive analytics and capacity to work in a variety of data situations. I'm looking to use my analytical, problem-solving skills, along with my passion for continuous learning, to make a positive impact on the growth of organizations.

Education

SKIT Jaipur

Bachelor of Technology in Information Technology

JNV, Jhalawar

Intermediate/+2

JNV, Jhalawar

High School

Dec. 2020 – May 2024

CGPA: 9.32

Apr 2017 – Apr 2018

Percentage: 76.20

Apr 2015 – Apr 2016

CGPA: 9.0

Experience

The Spark Foundation

Data Science & Business Analytics Intern

May 2023 – June 2023

Remote, India

- Developed an data analysis project in a team of 3 members on the Sample Superstore Data set using Python and data manipulation libraries like Pandas and NumPy which helps organizations in decision making.
- Worked on developing interactive dashboard for better data visualization using Power BI.
- Resolve issues related to model accuracy by fine-tuning the hyperparameters and performing feature engineering

Dotsquare Technologies

Python Intern Trainee

Jul 2022 – Aug 2022

Jaipur, India

- Learnt Python programming and data analysis techniques.
- Implemented an Exploratory Data Analysis project using Python (Pandas, NumPy) on the global terrorism data set to gain insights into trends, patterns, and geographical hot-spots of terrorist activities.
- Guided a team of 3 interns and addressed their implementation doubts regularly.

Projects

Twitter Sentiment Analysis | Python, NLP, ML, TF-IDF, NLTK

July 2023

- Design a NLP project which help in understanding of customer feedback, reputation management, political analysis, crisis management, and targeted marketing research.
- Deploy NLTK for data preprocessing, built a machine ML pipeline with three classifiers(Logistic Regression, Bernoulli Naive Bayes, SVM) and employed TF-IDF for feature extraction and got 82% accuracy with SVM.

Stock Market Prediction And Price Forecasting | Scikit-learn, TensorFlow's Keras, LSTM

November 2023

- Developed a stock market prediction system using machine learning techniques.
- Used LSTM-based deep learning architecture to forecast accurate stock curve for accurate price forecasting.

Indian Automotive Industry Analysis | Python, Numpy, Pandas, Matplotlib, Plotly

June 2022

- Analyze the latest data of Indian Automotive Industry and gather insights from it to understand the Indian market of cars, favourable for different specification on varying prizes help industries to improve features for maximum selling and profit maximization.

Skills

Languages: Python, C++, HTML/CSS, SQL

Expertise: DSA, OOPs, DBMS, OS

Technologies/Frameworks: Machine Learning, SciKit, Streamlit, Git/GitHub

Tools: VS Code, Jupyter Notebook, Google Colab, Microsoft Excel

Soft Skills: Leadership, Observation, Writing, Public Speaking, Time Management.

Certification

Advanced Data Analytics Using Python | UDEMY

June 2023

Cloud Computing Fundamentals | UDEMY

February 2024

Extracurricular

Team Leader: Lead a team of 5 members in Smart India Hackathon 2022 Prelims.

Challenge Conqueror: Successfully completed Google Cloud Ready Facilitator Challenge 2022 and won swags

Problem Solver: Solved 150+ Leetcode DSA problems over there(Handle: ankit_sh01).
