QUALIFICATIONS: -

Institute of Engineering and Technology Dr. Ram Manohar Lohia Awadh University, Ayodhya, Uttar Pradesh 2022

Degree: Bachelor of Technology in Information Technology

PROJECT DETAILS :

DOMAIN: Popular Retail Banking Loan

- The primary objective of this application is to provide loans to existing business accounts.
- Within this application, we offer five types of loans to our existing business customers :
 - Unsecured loans
 - HELOC loans (Home Equity Line of Credit)
 - SBL (Security Based Lending) loans
 - CDBD (Commercial and Development Banking Division) loans
 - SBLR (Security Based Lending Revolver) loans
- My role on this project is that of a developer. I work on various components, including Lightning Web Components, and Visualforce pages, and handle basic enhancements such as triggers, asynchronous apex, SOQL, SOSL, Apex, and more. Additionally, I assist in tasks related to admin responsibilities such as creating reports and dashboards, setting up sharing rules, validation rules, and surveys, and addressing any bug fixes that arise during the project's lifecycle.
- I have experience with automation tools such as Workflow and Process Builder flows, but the majority of my work has been focused on Flows
- I have hands-on experience in designing and implementing Apex classes and Visualforce pages, demonstrating proficiency in Salesforce development.
- I have hands-on experience in lightning web components.

DOMAIN: ASPIRE

- It was a Proof of Concept (POC) project developed for presentation at the Dreamforce event.
- This project was built on the Financial Services Cloud.
- Its purpose was to provide investment offers and fund recommendations to customers.
- In the project, I primarily worked on Lightning Web Components (LWC).
- I also integrated a chatbot powered by GPT into Salesforce to generate email content based on the current account profile and prompt details, offering personalized offers to the account.
- Additionally, I implemented dashboards and charts to dynamically display data based on the current employee's credit score using Lightning Web Component.
