SUMMARY:

Detail-oriented B.Tech Computer Science undergraduate (2026) with hands-on experience in data analysis, business intelligence, and analytical reporting. Proficient in Python, SQL, Power BI, Excel (Advanced), and Data analysis expression (DAX) for data cleaning, transformation, exploratory data analysis (EDA), KPI tracking, and dashboard development. Demonstrated ability to analyze structured datasets, build interactive data visualizations, and deliver actionable insights to support data-driven decision-making. Seeking entry-level Data Analyst / Business Intelligence Analyst / Reporting Analyst / MIS Executive roles in a data-driven organization.

TECHNICAL SKILLS :

Programming & Data Analysis:

- Python (Data Analysis, Data Processing, Basic Automation , libraries)
- SQL (Data Querying, Joins, Filtering, Aggregations)

Data Analytics & Business Intelligence:

- Microsoft Excel (Advanced: Data Cleaning, Pivot Tables, VLOOKUP/XLOOKUP, Reporting)
- Power BI (Dashboard Development, Data Visualization, DAX Basics, KPI Reporting)
- Tableau (Basic Dashboard Creation, Data Visualization)
- DAX (Basic Measures and Calculated Columns)

Databases Basics:

- MySQL (Basic Data Extraction and Queries)
- MongoDB (Intermediate Data Handling)

Data Sourcing & Validation:

- Apollo.io (Data Sourcing and Analysis)
- Contact Out (Contact Data Validation and Accuracy Checks)

Tools & Platforms:

- GitHub (Version Control, Project Management)
- VS Code (Python & SQL Development)
- Jupyter Notebook (Exploratory Data Analysis and Reporting)

ANALYTICS PROJECTS:

College Contact Directory Dashboard | Power BI, DAX:

- Cleaned, transformed, and validated structured institutional datasets using data preprocessing and data quality checks.
- Built interactive Power BI dashboards using DAX measures, slicers, filters, drill-throughs, and geo-maps.
- Performed trend analysis, KPI tracking, and descriptive analytics to analyze college distribution and contact availability.

Corporate & Campaign Data Analysis | Power BI, Python:

- Conducted Exploratory Data Analysis (EDA) using Python (Pandas, NumPy) to identify trends, patterns, and anomalies.
- Executed data validation, enrichment, and verification of professional datasets using Apollo.io and ContactOut.
- Developed BI dashboards to monitor campaign reach, data reliability, and performance metrics.

Loan Analytics Tool | Python, Advanced Excel

- Developed a loan analytics application to calculate EMI, interest components, and repayment schedules.
- Applied data modeling, financial calculations, and statistical logic to ensure accuracy and consistency.
- Automated calculations using Python and Excel formulas to improve efficiency and usability.

INTERNSHIP EXPERIENCE:

Data Analytics Intern | UptoSkills | Remote

June 2025 – September 2025

- Developed 10+ interactive dashboards using Power BI, Advanced Excel, and Python, enabling faster insight generation and reporting.
- Performed data cleaning, preprocessing, transformation, and validation on 5,000+ records, improving data accuracy and consistency.
- Conducted Exploratory Data Analysis (EDA) to identify trends, KPIs, and patterns for institutional and business datasets.
- Implemented DAX measures, filters, slicers, and drill-downs to enhance dashboard interactivity and usability.
- Applied data visualization and storytelling techniques to convert raw data into actionable business insights.
- Supported data-driven decision-making through structured reports and analytical summaries.

Python Development Intern | Cognifyz Technologies | Remote

October 2024 – November 2024

- Developed Python-based applications and scripts using modular programming and reusable functions.
- Implemented data processing, validation, and automation logic, improving execution efficiency and code readability.
- Solved 20+ logic-building and problem-solving tasks, strengthening analytical and algorithmic thinking.
- Collaborated with a remote team using structured communication and version-controlled workflows.

EDUCATION:

Bachelor of Technology (B.Tech) – Computer Science

NIMS University, Jaipur

September 2022 – May 2026

~ 8.02 SGPA

Higher Secondary Education (Class XII)

Saraswati Vidya Mandir

April 2019 – March 2021

~ 80.03 %

Secondary Education (Class X)

Saraswati Shishu Mandir

April 2014 – March 2019

~ 83.0 %

SOFT SKILLS:

- Analytical Thinking & Problem Solving
- Data Interpretation & Attention to Detail
- Verbal & Written Communication
- Time Management & Task Prioritization
- Cross-Functional Team Collaboration

ADDITIONAL INTERESTS / ACADEMIC INTERESTS:

- Data storytelling and dashboard design for effective business reporting
- Exploring Artificial Intelligence applications in data analytics
- Understanding UI/UX fundamentals to improve usability of data dashboards and reports
- Participation in hackathons and technical problem-solving challenges
