PROJECTS

Smart Contact Management System | Java, Spring Boot, MySQL, HTML, CSS

The Contact Management System has been developed to overcome the problems prevailing in the practice manual system. This software is supported to eliminate and, in some cases, reduce the hardships faced by this existing system. Moreover, this system is designed for the company's needs to carry out operations smoothly and effectively.

WhatsApp Chat Analysis | Machine Learning, Python, NLTK, SNA, Jupyter Notebook

WhatsApp Chat Analyzer is an analyzing tool for WhatsApp chats. The chat files can be exported from WhatsApp and generate various plots and graphs showing the number of messages, emojis, or images sent by a person, the most active group member, etc. It helps us to have a better understanding of our WhatsApp chat. This system is based on data analysis and pre-processing. The first step is that pre-processing plays a major role in machine learning. To apply the libraries, it must be pre-processed and stored efficiently.
