- **S.S.C** from Maharashtra State Board of Secondary and Higher Secondary Education, Pune with 78.91%in 2010

TECHNICAL SKILLS:

- **Salesforce:** Apex, Triggers, Lightning Web Component, Batch Apex,Flows
- **Web Technologies:** HTML, CSS, JavaScript
- **Programming Language:** Apex, C, C++
- **Database:** SOQL, SOSL

PROJECT DETAILS:

- **Project Name: Kinela HealthCare:**

Technologies: Apex, LWC, JavaScript, HTML, CSS

Role: Salesforce Developer/Administrator

Description:

This Project aims to develop a conceptual UI for the Healthcare team for ease to access all the required data and provide the best resources. It represents a transformative initiative leveraging Salesforce technology to drive innovation and excellence in healthcare management. By focusing on patient-centric care, operational efficiency, and compliance, the project aims to revolutionize the healthcare experience for patients and providers within the Healthcare network.

Roles and Responsibilities:

- Developed custom Lightning Web Components (LWC) and Apex classes to implement key features such as patient onboarding management, patient tracking, appointment processing, and reporting functionalities.
- Implemented LMS, LDS and lifecycle hooks for enhanced data communication and component interaction within the modules.
- Worked with the designing team and implemented responsive and intuitive user interfaces using HTML, CSS, JavaScript, and LWC components.
- Implemented apex triggers to enforce business logics and data validation rules, batch apex jobs to handle large volumes of data efficiently improving system performance.
- Implementing REST API and Cross-org Integration based on the requirement
- Utilized Service Cloud robust case management features to efficiently handle customer inquiries, support tickets, and service requests, customizing and configuring features to optimize service processes, enhancing customer satisfaction, and sorting applicant problems

- **Project Name : AFS Logistics:**

Technologies: Apex, LWC, JavaScript, HTML and CSS

Role: Salesforce Developer/Administrator

Description:

This project is to develop a portal to get the best and most effective ways to transfer the consignments and products from the first place to Destination and the customers. To satisfy customer demand and offer the most suitable deal possible to hold the customers and reach new ones. Checking the historical data and weather forecasts and following the transportation of goods in real-time can improve the process along with prevention from any possible distractions.

Roles and Responsibilities:

- Designed and developed Lightning Web Components (LWC) to implement key features of the Logistics portal component, including carrier registration forms, delivery scheduling, and Carrier eligibility checks.
- Migrated data from external sources and performed insert, delete, upsert, and export operations on millions of records using Data Loader.
- Implemented Apex controllers to handle server-side logic, data retrieval, and database

operations.

- Work on APEX Classes, Triggers, and Test methods to implement custom functionality.
- Worked as administrator granting and maintaining user roles, groups, permissions, and profiles and enabling various security controls.
- Hands-on experience in Customizing Reports and Dashboards for business use.
- Responsible for performing administrative and configuration functions in Salesforce.com CRM such as creating/modifying Objects, different types of fields, page layouts, record types, managing users, security settings, permission sets, etc.
