PERSONAL PROJECTS

Recruitment Apps using Salesforce

- It provides a basic framework for tracking open jobs and candidate information, including work experience, preferences, and comments from interviewers.
- This application provides HR to track the candidate details before and after the HR can send them email about location, job profile, salary etc.

Student Loan System

- This very project contains the details of the loans of the students and employees and helps the user to manage the loan portfolio of the lenders and borrowers .
- Provides quotes for payment amounts and interest rates .

Superset Dataset

- I have taken superstore dataset where I performed extensive data analysis to deliver insights on how the company can increase the profit while minimizing the losses.
- Technology where used like Power BI and RDBMS.

Online Ticket Reservation System

- This project is fully functional like a website from where we can book ,cancel and reschedule online tickets .
- Ensure that all booking procedures followed industry standards .
- Checked passenger manifests to confirm client bookings .
