WORK HISTORY

Salesforce QA | INSPIROWORKS - Remote

September 2023 – Present

****Programmer Analyst Trainee****

- **Contributed significantly** to the quality assurance and testing phases of multiple complex Salesforce-based projects, ensuring high-quality product releases within an **Agile SDLC**.
- **Managed and executed** comprehensive **test cycles** for key projects including:
 - **Public Impact: Tested and validated** critical functionalities including **course registration, automation workflows**, user roles, and **Experience Cloud functionalities** for a US-based educational platform. **Collaborated** with Senior QA leads to execute comprehensive test scenarios and **validate acceptance criteria**.
 - **AASW Mobile Application: Performed rigorous manual testing** of a Salesforce-built mobile application, focusing on UI/UX and core functionalities (course registration, marks, creative posts, feeds). **Documented and tracked** bugs and UI issues in **Jira**, providing **actionable feedback** to the development team, which led to [****quantifiable improvement in app stability/user satisfaction - add metrics if available****].
 - **SteadFast: Conducted extensive manual testing** for an Australian logistics project, integrating Steadfast with Machship. **Interacted directly with clients** to clarify requirements, report critical bugs, and validate functionality. **Developed and utilized** reports and dashboards to support project monitoring and successful delivery.
 - **IW Survey Application: Executed detailed testing procedures** for a proprietary Survey Application on **AppExchange**, ensuring adherence to functional and non-functional specifications.
 - **Plexus: Supported developers** by meticulously verifying implemented features against specified **user stories** and requirements in an ongoing project lifecycle, participating in **daily stand-ups**.

Salesforce Intern | Cloud Champ Technologies - Bangalore

June 2023 – September 2023

- **Gained practical experience** and hands-on expertise in **Salesforce administration and configuration**, contributing to various client projects within the Salesforce platform.
- **Configured diverse Salesforce applications** utilizing **custom objects, custom tabs, custom fields, validation rules, page layouts, record types, and relationships** to meet specific business needs and business requirements.
- **Implemented efficient data migration strategies** and **utilized process automation tools** (e.g., **Salesforce Flows**, Process Builder) to streamline operations and enhance system efficiency.
- **Configured robust security settings** including profiles, permission sets, and sharing rules, ensuring data integrity and access control within the Salesforce environment.
- **Designed and created comprehensive reports and dashboards** for data visualization and business intelligence, facilitating informed decision-making.
- **Developed and managed approval processes, formula fields, queues, public groups, and roll-up summary fields** to optimize business workflows and data accuracy.
- **Automated critical tasks** and configured email alerts, improving operational responsiveness and system notifications.
- **Managed user and profile creation**, maintenance, and security, supporting smooth user onboarding and access management.
