Experience

- **SiraTek Consulting Pvt. Ltd**
Salesforce Developer
Domain: Industrial Automation, Telecommunication, EV Automotive
Projects: John Keells CG (Sri Lanka)

July 2025 - Present

JOHN KEELLS CG:

Implemented Salesforce Automotive Cloud with tailored sales workflows, multi-line inquiry conversion, round-robin lead assignment, and campaign-driven sales tracking to streamline the sales process.

Delivered unified real-time visibility of CRM, inventory, sales, and post-sale service operations, enhancing operational efficiency and cross-functional collaboration.

Developed custom reports and interactive Analytics Studio dashboards to monitor sales performance, service metrics, and inventory trends, enabling data-driven decision-making.

Configured Salesforce mobile app for field teams, providing on-the-go access to sales, service, and inventory data and improving productivity.

Projects

- **End-to-End Automotive Sales, Service & Inventory Management Solution (CRM).**

Client: JKCG, Sri Lanka (International Automotive Company)

Role: Salesforce Developer

Industry: Automotive

Duration: 5Months (18th August 2025-19th January 2026)

 Project Description

Designed and delivered an end-to-end Salesforce-based automotive service solution to streamline work orders, job cards, labor management, and invoicing for end users including service advisors and workshop managers.

 Key Contributions & Achievements

Built custom Lightning Web Components (LWC) to deliver a modern, responsive UI for automotive service workflows

Developed Apex controllers, triggers, and helper classes to implement complex business logic aligned with automotive service operations

Automated job card creation, labor allocation, and service billing processes, reducing manual effort and operational errors

Integrated Salesforce Flows for guided user processes and validations across service lifecycle

Optimized end-user experience by improving UI consistency, performance, and data visibility

Implemented role-based access controls using profiles, permission sets, and record types

Ensured high code quality with 85%+ Apex test coverage and followed Salesforce best practices

Collaborated with international stakeholders and cross-functional teams to gather requirements and deliver scalable solutions

 Tech Stack

Salesforce, Apex, Lightning Web Components (LWC), SOQL, Flows, JavaScript, HTML, CSS
