PROJECTS

E-Commerce, *Flow & Visualforce Developer*

10-2023 – present

- Engaged in a Sales Cloud project focused on facilitating alcohol sales via websites.
- Tasked with creating customized PDF documents and implementing new requirements using Flow, Apex, Batch processing, and Lightning Web Components (LWC).
- Collaborated closely with client to understand and address specific business needs related to ship their orders.
- Executed custom solutions to enhance shipping processes and streamline operations within the Sales Cloud environment.
- Provided ongoing support and maintenance for implemented features to optimize performance and address any emerging issues.

Contract Management, *Salesforce Developer*

09-2022 – 11-2022

- The project is centered around leveraging Experience Cloud and Sales Cloud to handle information concerning tenants, landlords, and properties.
- The primary focus is on developing a registration page using a screen flow, enabling the collection of vital details about tenants and landlords.
- Information about tenants and landlords is gathered from a community site, streamlining the data collection process.
- The objective is to facilitate the efficient management of tenant and landlord information within the realm of property management.

Sales & Service, *Salesforce CPQ Developer*

08-2023 – 10-2023

- The project entails implementing an amendment process for the client devoid of point-and-click tools, opting instead for a flow-based approach.
- The flow is initiated by clicking a button on the Account object to trigger the amendment process.
- Various components such as Apex, Flows, Lightning Web Components (LWC), Batches, Future classes, and Test classes are integral to the project's execution.
- Additionally, configuration pertaining to Configure, Price, Quote (CPQ) is within the scope of the project.
