WORK EXPERIENCE

Revature

Jun, 2024 – Present

Associate Software Engineer (Trainee)

- Develop and enhance Java applications using JDK, Eclipse, and STS, while utilizing Git for version control, MySQL for database management, Docker for containerization, Apache Tomcat for application deployment, and Jenkins for CI/CD automation.
- Participate in intensive training programs focusing on Java, Docker, Jenkins, SQL, and Git, gaining hands-on experience in software development and engineering practices.
- Engaged in comprehensive training sessions focused on object-oriented programming principles and industry best practices, enhancing skills in developing and testing software applications.
- Practiced version control with Git, collaborating with peers to manage code repositories and resolve conflicts.
- Engage in Agile methodology training, participating in simulated sprints and stand-up meetings to understand project management and team collaboration.
- Dedicate to continuous learning and professional development, exploring new technologies and methodologies to improve software development skills.

Thutech Infosystem

Jan, 2024 – Jun, 2024

Salesforce Developer Intern

- Successfully implemented and customized Salesforce and MS Dynamics solutions to optimize customer relationship management processes.
- Ensured data integrity and accuracy by managing and maintaining comprehensive customer information within both Salesforce and MS Dynamics.
- Utilized reporting and analytics tools in Salesforce and MS Dynamics to provide actionable insights and support data-driven decision-making.
- Collaborated with cross-functional teams to implement and customize MS Dynamics solutions, optimizing workflows and improving operational efficiency for over 40 years of customer protection plans.
- Assisted in the development and implementation of CRM strategies using MS Dynamics, contributing to greater protection and peace of mind for members.
- Customized and configured Salesforce and MS Dynamics to meet specific business requirements and enhance functionality.
- Collaborated with cross-functional teams to analyze business needs and implement effective CRM solutions using both Salesforce and MS Dynamics.

EDUCATION

G. H. Raisoni College of Engineering and Management, Pune

2024

B.Tech, Electronics and Telecommunication

CGPA: 8.0

Narayana Junior College, Hyderabad

2019

Higher secondary

Percentage: 84.20

SKILLS

Programming Languages: C++, Java, JavaScript, APEX, SOQL

Libraries/Frameworks: LWC, Spring Boot, Eclipse, Apache Maven, Jenkins

Tools / Platforms: Salesforce.com, Microsoft Dynamics 365, Power Apps, Postman, VsCode

Soft Skills: Effective Communication, Problem-Solving, Attention to Details, Adaptability, Continuous Learning.

Achievements

Salesforce Trailhead Ranger

Certifications

Introduction to Web Development with HTML, CSS, JavaScript - Coursera, IBM

Fundamentals of Kubernetes Deployment - Coursera, LearnQuest

Introduction to Internet of Things - NPTEL

Projects

Event Management App

- Developed and deployed a custom event management application on the Salesforce platform.
- Integrated Salesforce standard objects and custom objects to streamline event data management and reporting processes.
- Configured and customized Salesforce pages and navigation to optimize user workflow within the event management application.
- Utilized Salesforce Apex classes and SOQL queries to retrieve and manipulate data related to different objects.

RFID Based Smart Car Parking System

- The RFID-Based Smart Car Parking System is an innovative solution designed to optimize the traditional parking systems by incorporating RFID technology.
- This system enhances efficiency, reduces congestion, and provides a seamless parking experience for both vehicle owners and parking management authorities.
