- Showcase a robust skill set in GitHub by creating PRs, resolving merge conflicts, and translating client needs into effective Salesforce designs, implementing best practices to reduce custom development requirements.
- Demonstrate expertise in Asynchronous methodologies such as Batch, Queueable class, and future methods.
- Proficient in leveraging Salesforce tools such as Apex, LWC, and SOQL to design and implement customized solutions, ensuring seamless integration and enhanced user experience.
- Expertise in Unit testing and writing Apex test class.
- Excellent Good Team Player, Self-motivated and control to meet challenges.
- Experienced in change set to deploy in production.

Core Competencies

Project Management
Salesforce Administration
Security and Access Control

Apex Programming
Salesforce Deployment
Salesforce API Integration

Agile Methodologies
User Experience Design
Risk Management

Work Experience

Aug'2021 to Present: Software Engineer at RaagviTech, Hyderabad

Project: Quest Money – Case and Task Managements

Client: Questrade

Role:

- Spearheading Salesforce development projects with a focus on managing cases and tasks to enhance the service agents' experience.
- Collaborating with robust teams to gather requirements, design solutions, and implement Salesforce best practices.
- Utilizing GitHub for version control, resolving merge conflicts, and ensuring code quality.
- Implementing asynchronous methodologies like Batch, queueable class, and future methods for optimized performance.
- Leading unit testing efforts, writing apex test classes, and ensuring high code coverage.
- Creating Users, Roles, Profiles, Relationship, Page Layouts, Record types, Validation rules, Permission sets, Profiles permissions.
- Working on integrating the retrieval of deposit amount details from the Mambo database to sync with Salesforce.
- Managing deployment processes through Change sets and VS Code.
- Monitoring project timelines, coordinating with team members, and ensuring project milestones are met.

Achievements:

- Successfully built LWC components to display tasks to back office users, with the ability to show different views based on the login type (Agent or Supervisor).
- Successfully managed the QuestMoney project, enhancing Case and Task Management functionalities in Financial Service Cloud.
- Implemented Lightning Web Components for UI enhancements, improving UX and task management efficiency.

Client: Blackthorn

Project: Event and Payment Management

Role:

- Led the development of the Event and Payment Management project for Blackthorn, focusing on event creation, attendee management, and payment processing functionalities.
- Created custom LWC components for event registration, attendee management, and logistics tracking, integrating with Salesforce standard and custom objects.
- Developed Apex triggers for data processing and manipulation, ensuring data integrity and security.
- Implemented sharing rules and security settings for data protection and compliance.
- Conducted bug fixes, batch script development, and issue resolution to maintain system functionality.
- Utilized Workbench and Data Loader for data management and migration tasks.

Highlights:

- Developed and deployed multiple batch scripts to alert teams about transaction failures, ensuring timely issue resolution and to alert Attendee's about event details.
- Technology used: Lightning Aura, LWC, Apex, Apex Batch jobs, Scheduled Apex,Flows, Visual force, API Callouts.

Education

- Bachelor of Engineering, Mechanical Engineering, VSM Institute of Technology, Nipani, Karnataka, 2019
- 12th, Devchand Collage Arjunnagr, Kolhapur. Maharashtra, 2013
- 10th, Akol Highschool, Akol. Belgaum Karnataka. 2011

Technical Skills

- Lightning Web Components (LWC)
- Financial Service Cloud
- Apex Programming
- Jira
- Visualforce
- Trigger
- Test Class
- GitHub Version Control
- VS Code
- Salesforce Admin
- SOQL and SOSL Query Language
- RESTful Services

Certifications

- Salesforce Certified Platform Developer, 2024
- Salesforce Associate Certified, 2023
