WORK EXPERIENCE

Senior Salesforce Developer Persistent Systems Ltd

12/2021 - Present

Pune, India

Roles and Responsibilities

- Enhanced existing Sales Cloud and Implemented Configure, Price, Quote (CPQ) to align with business needs, showcasing expertise in Salesforce customization.
- Designed and Integrated Salesforce Contracts and Subscriptions with Zuora for customer invoices through Platform Events.
- Skilled in Salesforce CPQ processes, including managing Opportunities, Product Configurations, Product Rules, Price Rules, Quotes, Orders, and Contracts.
- Designed and implemented a sophisticated Lightning Web Component with advanced CSS standards to evaluate account performance across multiple metrics, reducing manual data analysis time by 60%.
- Developed a multi-step Lightning Web Component flow for crafting initiatives, enabling users to enhance their account performance, resulting in a 30% reduction in the time needed to perform these steps otherwise.
- Built 2 asynchronous Apex sharing solutions: one for sharing a custom object with territory groups and another for enabling visibility between internal and external users.
- Collaborated in building custom Salesforce Territory Management in order to enable triggers on Territory assignments.
- Integrated Salesforce with Wrike, an external project management tool through Platform Events to sync tasks.
- Designed and developed reusable Lightning Web Component for consistent use across the Community site. Created a SASS library to ensure reusability of CSS for the components, improving consistency across 10+ components
- Implemented audience segmentation in Experience Cloud to personalize content and page layouts based on user permissions.
