Softline Solutions Private Limited– Bangalore.

Project #1

TalentDNA (Resources Management)

Description: The business need is a huge lack of visibility is to come up with all the resources should be utilized in the proper way. Here with the skills and resource management we are ensuring data and information planning. This is the process to fill the requirement and to take additional resources who are required to complete a project without affecting schedule of others.

Client: ABB Solutions

Environment: Salesforce.com Platform, Apex, JavaScript, REST API, Data Loader, Change Sets, GitHub.

Roles and Responsibilities: -

- Worked on both customization and configuration.
- Designed and developed Approval Process based on the application requirements.
- Created validation rules and flows in Salesforce.com.
- Designed and developed Apex Classes and Apex Triggers for various functional needs in the application.
- Worked on web services in making callouts and exposing Salesforce functionality using REST API.
- Worked on creating Lightning Tabs and JavaScript.
- Used **Data Loader** for insert, update, and bulk import or export of data from Salesforce.com subjects. Used it to read, extract and load data from comma separated values (CSV) files using **Apex Data Loader**.
- Deployed the components from one Sandbox environment to another Sandbox/Production environment using Change Sets, VS Code and GitHub.

Project #2

HCA

Description: HCA Healthcare is an American for-profit operator of health care facilities that was founded in 1968. It is based in Nashville, CA seeks to develop a single strategic Salesforce Platform to support the business. The Salesforce.com application is to leverage CRM to Build Great Client Relationships and to support the sales & Service process and manage the prospect and client relationships more effectively.

Provide a single strategic CRM (Customer Relationship Management) platform to support the HCA, and to efficiently manage the process by Reduce infrastructure costs by replacing on premise legacy architecture with salesforce.com services

Client: ATOS SYNTEL

Environment: Salesforce.com platform, Workflow and Approvals, Reports, Custom Objects, Tabs, Reports, Dashboards, Apex Language, Components, Data Loader, Apex classes, Apex triggers, JavaScript.

Roles and Responsibilities: -

- Maintain and develop the **Custom objects, Custom fields, Custom tabs, and Validation rules.**
- Defined **lookup** and **Master-Detail** relationships on the objects and created junction objects to establish connectivity among objects.
- Creating **Workflow Rules, Tasks, Email Alerts,** and Components to suit the needs of the application.
- **Customized page layouts for Opportunity, Contacts and Accounts depending upon user roles and groups.**
- Used **Data Loader** for insert, update, and bulk import or export of data from Salesforce.com subjects. Used it to read, extract and load data from comma separated values (CSV) files using **Apex Data Loader.**
- Creating **Apex classes & Triggers.**
- Worked on Deployment using VS Code.
