PROJECTS

- **EVENT MANAGEMENT SYSTEM(EventCloud)**

EventCloud will help the event coordination and finance teams oversee the planning and accounting of several events. This includes creating events, tracking sponsorship, sessions, and attendance. It also leverages a variety of Salesforce functionalities, including custom objects, classes, triggers, flows.

Features-

- **Custom Objects**
- **Trigger:**
 - i. Write a trigger to prevent the status of a sponsor record from being updated to "Accepted" unless it is associated with an event.
 - ii. Write a trigger to automatically update the net revenue of an event record whenever there are changes to its gross revenue or total expenses.
- **Flows:**
 - i. Flow to automatically mark a sponsor status as "Pending" if the field is blank upon creation.
 - ii. Flow to automatically set a sponsor's tier based on their contribution amount.
- **Validation Rule:**
 - i. Need the system to prevent the creation of a sponsor without an email.

- **APPROVAL PROCESS**

05/2023

At times, certain decisions are beyond the user's control when it comes to approving or rejecting a request. This is where the Approval Process comes into play

By applying approval process, it helped organization to do not miss the high deals.

- Developed an Approval Process for Opportunity
- Activates when the Opportunity Amount exceeds 1 lakh.
- User is required to seek approval for the amount.
- Manager action is necessary for the process to proceed.
- If the manager approves, the Opportunity status is set to 'Closed Won'.

- **TRIGGERS**

11/2023

In trigger user want to show the latest Opportunity amount on related Account field.

Using trigger helped the user to keep track of latest opportunity amount in associated with account object.

- Firstly, created a field on Account object latestOpportunityAmt
- Developed an after trigger on Opportunity object.
- Checked if the Opportunity is related to any account.
- If true I created an instance of account object.
- Linked the created Account instance with the Opportunity.
- Added the updated instance to the list.
- Updated the list to reflect the changes.
