

Deepika Jain

Salesforce Developer

PROFESSIONAL SUMMARY

- **Salesforce Developer** with over 2 years of experience in developing custom solutions to enhance Salesforce CRM functionality. **Proficient in managing complex configurations**, automating processes, optimizing environments, and ensuring robust security. Passionate about continuous learning and adapting to the evolving Salesforce ecosystem to deliver **innovative, scalable solutions** that meet diverse client needs.
- Looking for an **opportunity** that presents **new challenges**, where I can leverage my expertise to make meaningful contributions and **collaborate with a team** that values innovation and excellence.

SKILLS

Salesforce Administration | **Flows** | Data Management | **LWC** | Customization | Lightning App Builder | **Data Loader** | Release Management | AppExchange | Process Automation | CPQ | **Apex** | **Apex Triggers** | **SOQL** | SOSL | **Reports/Dashboards** | Batch Class | Roll Up Helper | **GearSet** | **Jira** | User Management | Test Class | REST API | SOAP API | Microsoft Office (Excel, PowerPoint, Word) | Integration | Web services | **Standard and Custom Objects** | Sharing rules | **Profiles** | Queues | Changeset | Apex Callouts | Workbench | **Documentation** | Lighting Studio | Field Service Lightning | Aura | Javascript | **Validation Rules** | Communication | **Ownership** | Teamwork | **Problem-solving** | Analytical Thinking | **Adaptability** | Time Management | Cross-functional Collaboration | Decision Making | Presentation Skills | **Mentoring**

EXPERIENCE

Amicus Technology Pvt. Ltd.
Salesforce Developer

Raipur, CG
July 2023 - Present

- Developed and implemented a **diverse set of Salesforce configurations** covering various aspects such as objects, fields, relationships, layouts, pages, record types, validation rules, formula fields, roll-up summary fields, reports, dashboards, complex flows, processes, approval processes and components. Configured pages, profiles, permission sets, custom permissions and sharing rules, ensuring system integrity and security. **Was instrumental in managing projects**, utilizing Jira for tracking and documentation, which ensured efficient project oversight and execution.
- Configured efficient business operations by designing and implementing robust Salesforce processes and flows. Utilized in-depth knowledge of Salesforce flows to **develop complex flows** for managing and automating interactions between multiple related objects, created **user-friendly interface** to provide custom wizards and ensure data quality.
- Managed the development and enhancement of Salesforce **Lightning Web Components** with expertise in Apex Controller Classes, SOQL, and SOSL. **Implemented dynamic search, real-time validation, and DML operations** for data manipulation. Enhanced the UI using the Lightning Design System, resolved major bugs, and applied Apex Enterprise Patterns to create scalable, maintainable solutions that improved operational efficiency and elevated user satisfaction.

CERTIFICATIONS

- Salesforce Platform Developer I
- Process Automation Accredited Professional
- Security & Privacy Accredited Professional
- Core Java Certified – Effcon

AWARDS

- **Rookie Award**

Recognized for exceptional accomplishments at the 2023 town hall, highlighting significant contributions to the organization's success.

ACADEMIC CREDENTIALS

- Bachelor of Technology (Computer Science), Government Engineering College, Raipur (C.G)

- Developed **Apex Classes, Triggers and Batch Classes**. Diagnosed and **resolved complex recursive trigger issues** and governor limit violations in Salesforce, utilizing advanced debugging techniques. Implemented a custom trigger handler framework to streamline trigger management and improve system performance.
- Conducted **data migrations** between sandboxes & production environments, leveraging tools like Change sets and Gearset, for deployment and data backups. Supported businesses during the initial Go-Live phase by **resolving bugs and issues** encountered during the hypercare period. **Consistently delivered projects and service requests** on time, exceeding expectations through strong operational skills and collaborative teamwork across functional teams.

Associate Salesforce Developer

July 2022 - July 2023

- **Proactively managed user administration** in Salesforce and communities, encompassing access provisioning, permission set/profile configuration, public group memberships, MFA issues, and user deactivation. Proficiently resolved access-related issues with **personalized user support**.
- **Assisted senior administrators** in resolving real-time service requests, gaining valuable experience and knowledge. Demonstrated **strong analytical skills**, and Salesforce expertise by conducting independent research and analysis for POCs.
- Took **ownership of data cleanup activities** using tools like Data Loader, Data Loader.io, Data Import Wizard, and Workbench, significantly **improving data quality** and ensuring accurate updates. Gained experience in ETL operations and implemented complex validation rules to enhance data integrity and uphold high-quality standards.
- **Developed Test Classes** to **improve code coverage** and performed thorough **manual testing** (Sanity, Smoke, Regression) during SIT to identify and document potential issues. Collaborated with the team for timely resolution, ensuring project progress, and facilitated User Acceptance Testing (UAT) by **assisting users with system navigation**.

LEADERSHIP EXPERIENCE

- **Mentored junior administrators and developers** on Salesforce platform functionality and advanced automation techniques using Salesforce Flow, cultivating their proficiency in system administration/development and equipping them to efficiently manage Salesforce processes.
- **Facilitated quarterly presentations** on Salesforce Releases, effectively presenting the latest developments in **Admin and Flows** functionalities to business users and the offshore IT team.
- Developed and managed projects, including **"WFR to Flow Conversion"** and **"Process Builder to Flow Conversion,"** collaborating with administrative peers to convert all the workflow rules and process builders into flows while **following the best practices**. This resulted in streamlined processes and enhanced system efficiency.
