Data Management and Tools

- Data Modeling, Data Migration Tools: Data Loader, Import Wizard

Automation

- Flows, Batch Apex, Schedulable Apex

Web Development Technologies

- HTML, CSS, JAVASCRIPT

Projects

Child Support Management Solution for SupportPay

Project Overview:

SupportPay is a comprehensive platform designed to help parents and caregivers efficiently manage child support and shared expenses. It simplifies financial interactions, reduces conflicts, and offers a user-friendly interface for tracking and managing expenses. The platform includes features such as automated payment reminders, detailed expense reporting, and secure transaction processing, promoting transparency and accountability in financial management.

Roles And Responsibilities:

- Configured Salesforce objects, fields, and relationships.
- Implemented validation rules and record types for data integrity and user workflow optimization.
- Automated business processes via Apex Triggers and Flows.
- Developed high-performance Lightning Web Components (LWC) and custom components.
- Conducted data mapping, migration, and transformations, ensuring seamless transitions.
- Configured user access, roles, profiles, and security settings adhering to best practices.
- Collaborated cross-functionally for troubleshooting, optimization, and enhancing user experience.
- Analyzed requirements, designed solutions, and implemented complex business logic and automation.
- Adhered to Salesforce best practices and security standards throughout the project lifecycle.

Blood Donation Management Platform

Project Overview:

Created a comprehensive blood donation platform on Salesforce for the American Red Cross, focusing on efficient donation management, streamlined donor interactions, and improved blood drive coordination. Leveraged Salesforce's declarative tools and Apex coding to develop a scalable and customizable solution. The project streamlined donation processes, enhanced donor communication, and provided valuable insights for targeted outreach, resulting in increased donation rates and improved donor satisfaction.

Roles And Responsibilities:

- Designed and implemented a robust data model with standard and custom objects. Defined relationships, page layouts, record types, and validation rules to ensure data integrity and efficiency.
- Configured security settings, roles, profiles, and sharing rules to manage internal and external user access. Implemented field-level security to protect sensitive donor information.
- Developed complex Apex classes and triggers to automate key business processes.
- Implemented automated workflows and processes using Flow and Triggers.
- Developed batch Apex and scheduled Apex jobs for periodic data processing and reminders.
- Created dynamic and responsive LWC components to enhance user experience and engagement.

Work Experience

-
- Neptune Information Solutions as Software Developer from March 2019 to Present.
 - Aerizone Creative Labs Pvt Ltd as Data Analyst from 2016 to 2019.
