PROFILE

☀️ Salesforce Developer with 3+ Years of Experience | Experienced in crafting tailored solutions with Flows, Apex, Triggers, and LWC. Proficient at creating seamless business processes, I am actively seeking an opportunity to apply my skills and expertise within a software organization. By leveraging my experience, I aim to contribute to the growth and success of the organization while further advancing my own professional development.

PROFESSIONAL EXPERIENCE

C L Infotech Private Ltd

09/2023 – present | Bengaluru, Karnataka

Salesforce Developer

ProjectName - Expense System

Client Name - IBM

Technology- Lightning, Apex, Rest, Securities

Team Size - 7

Description - Expense's current salesforce sales data sharing model hinders users when trying to report on and view records in the sales cloud. Unnecessary processing is running which consumes user licenses. Additionally, the user experience needs to be updated to provide a best-in-class lighting experience for users who are accessing Salesforce on mobile devices. The objective will be to design, build, and launch a new salesforce sharing architecture for Expense users. Importantly, Expense wants to use an effective way to get stakeholders to adopt new ways of working and truly drive improvement to operational metrics and ultimately, financial results.

Responsibilities:

- Involved in the discovery phase to get the requirements for the project to start.
- Involved in the end-to-end discussions of the project to start, analyzed, and understood the existing Implementation and Architecture.
- Reviewed and analyzed current salesforce org and recommended an intuitive design.
- Salesforce Identity and Access Managementfor Expense users – OWD, Roles,Profiles.
- Model and implemented the best practices for salesforce Role Hierarchies.
- Integration with Workday implemented the REST integration with Workday to get the new joiner's information into the salesforce.
- Implemented the Sharing settingswhich can manage exceptions to report structure and Account Ownership.
- Worked on creating profiles and permission sets for the respective access for the Divisions and Regions.

Bharat Financial Inclusion LTD (IndusInd Bank)

05/2021 – 09/2023 | West Bengal, India

Junior Salesforce Developer

Project Name - Pragati

Client Name - Bharat Financial Inclusion Ltd IndusInd Bank

Technologies - Sales Cloud ,Flow, Apex, Triggers, LWC

Team Size - 8

Description -Pragati, developed by BFIL, leverages Salesforce to optimize financial operations. It efficiently tracks member data, including disbursed loans, weekly EMI payments, and deposits. With its user-friendly interface and real-time insights, Pragati streamlines processes, enhances transparency, and empowers institutions to make informed decisions swiftly.

Responsibilities:

- Analyzing the requirements and converting them into functional/technical specifications. Managed all processes that impact/relate to Salesforce.com.
- Worked closely with Business side Architects to get their requirements and draft the business logic.
- Used Assets Libraries and static resources for placing the images and icons for the pages and to show them in a dynamic way.
- Created custom permissions to check the securities and access given to the customer and made validations accordingly.
- Worked on creating different sets of record types, page layouts, fields, sections, validations, Formulas, and restrictions for different profiles (Sales Team, Financial Team, Account Team, System admins) to have their specific functionalities.
- Worked on all the test classes to get coverage of more than 90%.
