PROJECTS HANDLED

Project2- E3 Experience

SALESFORCE DEVELOPER | January 2023 to Sep 2023.

JACOBS | Bangalore

Description:

Human Resource Management (HRM, or simply HR) is a function in every organization which is designed to increase employee performance in aligning with employer's strategic objectives. Primarily focused on how people are managed within organizations, human resource management is driven by systems and policies.

Responsibilities:

- Implementing on Experience Cloud to grant access to various websites.
- Developed pages using LWC components.
- Working on salesforce deployments using Copado managed packages.
- Responsible for granting access to various designated individuals.
- Actively collaborating with product owners to understand business functionality.
- Developed custom pages where HR can review the performance of an employee.
- Developed Apex Classes and Apex Triggers for various functional needs in the Application.

Project1- Data Migration

Salesforce Developer | August 2022 to December 2022

Schneider Electric| Bangalore

Description:

Data Migration aims to migrate the data from one salesforce org to another using the ETL types (extract, Transform, Load) Tools such as Data Loader, Data import Wizard, Data loader.io, Workbench.

Responsibilities:

- Performed functionality testing on a Salesforce instance using dummy data.
- Understanding the volume and duplicity of data with end users.
- Implemented filter criteria to extract the right data into the new instance.
- Customized automation tools to avoid disrupting data load activities.
- Performed system stamp mode at various checkpoints to extract updated records.
- Customized auto-number fields to replicate exact data in the new org.
- Replicated the same data in audit fields based on record age.

DECLARATION

I attest to the accuracy of the information contained in this resume to the best of my knowledge and belief.
