EXPERIENCE

HIC Global Solutions

Salesforce Developer Trainee - 09/23 - Current

- Developed Lightning Web Components (LWC) for Sales Cloud to enhance user experience.
- Implemented business logic using Apex classes, Asynchronous Apex, and Apex Triggers to meet various functional requirements.
- Designed custom LWC Components utilizing Salesforce Lightning Design System (SLDS) for tasks such as request submission and displaying attached files within cases.
- Created Scheduled, Screen, and Record-Triggered Flows, as well as Approval Processes.
- Developed Triggers, Email Templates, and Validation Rules. Managed Change Sets and deployments.
- Participated in daily Scrum Meetings, collaborating with team leads and business analysts to gather requirements and discuss technical solutions.
- Configured Lightning Apps, Record Pages, Page Layouts, Record Types, compact layouts, highlight panels, and action buttons.
- Implemented Record-Triggered Flows to automate various business processes including task creation, lead conversion, and opportunity stage updates.
- Managed profiles, users, and access permissions using permission sets and configured security settings such as Organization Wide Defaults, Roles & Hierarchies, Sharing Rules, and Public Groups.
- Established Lookup and Master-Detail Relationships between objects and created junction objects to establish connections among them.
- Developed Visualforce Pages to generate invoices with a structured Data Table layout.
- Implemented custom controllers and extensions to manage data retrieval and manipulation within the Data table.
- Designed the Visualforce Pages to dynamically display invoice details such as itemized lists, quantities, prices, and totals.
