OBJECTIVE

Eager to apply my data analysis skills in a dynamic environment. Skilled in SQL, BASE SAS coding , SAS Viya ,Python and data visualization. Aspiring to contribute to data-driven decision-making processes and eager to develop further in data analytics.

EDUCATION

Masters In Computer Application, Poornima University - Present

Bachelor Of Business Administration, St. Wilfred PG College, Rajasthan University 2019 - 2022

SKILLS

Technical Skills - SQL, Python, SAS Analytics, Data Visualization, Base SAS Programming, SAS Text Analytics , Machine Learning using SAS & PYTHON

EXPERIENCE

Data Science Using Machine Learning Intern May 2024 - August 2024

Grras Solutions Pvt. Ltd

Jaipur, Rajasthan

- Grras Solutions has established partnerships with leading technology companies and certification bodies, enabling it to offer globally recognized certifications such as Cisco, Red Hat, Microsoft, AWS, and more.
- Collecting, cleaning, and organizing data from various sources. Performing exploratory data analysis to identify trends, patterns, and outliers.
- Assisted in the development of dashboards and reports to visualize key performance metrics and trends.
- Utilized SQL, Excel, and Python to manipulate and analyze large datasets.
- Contributed to the identification of actionable insights through data mining and statistical analysis.

PROJECTS

- **House Price Prediction** - Developed and implemented a machine learning model for house price prediction using Python, Pandas, and Scikit-Learn, achieving [accuracy/other metric] accuracy. Conducted data preprocessing, feature engineering, and model tuning to optimize performance and scalability.
- **Car Price Prediction** - Designed and deployed a machine learning model for car price prediction utilizing Python, Pandas, and Scikit-Learn, achieving [accuracy/other metric] accuracy. Conducted comprehensive data preprocessing, feature selection, and hyperparameter tuning to optimize model performance and scalability.
- **Telecommunication** - Developed a machine learning model to predict customer churn for a telecom company, identifying key factors leading to customer churn. The model analyzed customer behavior, service usage, and demographic data to classify whether a customer would leave the service. Insights from this model helped in designing targeted retention strategies.
- **Smart Watch** - Developed a machine learning model to predict customer purchase behaviour for a new smartwatch product based on a pilot test conducted across retail stores. The project aimed to identify key customer segments and factors influencing smartwatch purchases to optimize marketing efforts for a nationwide campaign.

CERTIFICATION

- Data Science And Machine Learning - Grras Solutions Pvt .Ltd
- Emotional Intelligence From IIT KHARGPUR
- PROJECT EXPO-PRAYOGAM-2024
- INTRODUCTION TO AI
- SILVER MEDAL IN DEVELOPING SOFT SKILL AND PERSONALITY FROM IIT KANPUR
