Summary

B.Tech CSE graduate with a Google Data Analytics certification. Proficient in SQL (CTEs, window functions), Power BI (DAX, modeling), Python (Pandas, NumPy, ETL), and Excel (Power Query). Developed scalable dashboards handling **1M+** records and automated data processes. Seeking a Data Analyst role to apply statistical analysis for actionable insights and business performance optimization.

Technical Skills

Languages : Python (Data Analysis, Automation), SQL (Data Querying, Optimization), Java

Frameworks : Pandas, NumPy, Seaborn, Matplotlib

Analytical Tools : Power BI (DAX, Modeling), Advanced Excel (Power Query, PivotTables), Tableau

Databases : MySQL(Window Functions, CTEs, Stored Procedures)

Experience

AtliQ Technologies - Data Analyst Intern

Jul 2025 – Aug 2025

- Performed **data variance analysis** and debugged **SQL** queries, demonstrating **critical thinking** and **attention to detail** to ensure 100% accuracy in data extraction from MySQL Workbench.
- Applied advanced data cleaning and **data normalization techniques**, showcasing **problem-solving skills** to maintain data integrity and optimize retrieval processes.
- Designed and delivered customizable dashboards using Power BI, leveraging creativity and **stakeholder communication** to provide actionable insights

Projects

Business 360 - Brick & mortar and ecommerce

[Live Dashboard](#)

- Tools Used: Power BI, SQL, Excel, DAX Studio
- Engineered a multi-view Power BI dashboard across five departments (Sales, Finance, Supply Chain, Executive, and Marketing) to analyze global selling patterns at AtliQ Hardware
- Imported and integrated data from 2 sources (MySQL and Excel), handling over **1 million** records while constructing robust data models and visualizations in Power BI
- Enhanced reporting efficiency through DAX Studio, achieving **30%** storage savings and a **5%** performance improvement

Strategic Hospitality Analysis

GitHub

- Tools/Framework Used: Jupyter, Python, Pandas, NumPy, Seaborn, Matplotlib
- Conducted a data cleaning and transformation on **100k** records for a hospitality analysis project, improving data accuracy
- Developed 4 Python scripts in Jupyter Notebook to automate the data preparation process, reducing manual effort by **70%**.
- Generated actionable insights from the cleaned data, leading to a **20%** improvement in operational efficiency across the hospitality division.

Education

JECRC University, BTech in Computer Science

Aug 2022 – Jul 2026

- GPA: 8.11/10.0
- Coursework**: DBMS, Probability & Statistics, Data Structures and Algorithms (DSA), OOPS

Certifications/Achievements

- Google Data Analytics Professional Certificate — Coursera
- Google Cloud Career Launchpad (Cloud Engineer track) — Google Cloud Learning Services
- Get Job Ready: Power BI Data Analytics for All Levels 3.0 — Codebasics
- 4-star Gold Badge in SQL — HackerRank
