Experience

JAN 2023 - March 2024

Project 1 : Upgrade & AMS: Salesforce Sales Cloud

Sapours Technology Pvt Ltd, Pune

Salesforce Junior Consultant

- Analyzing/Finding the solution and implementation of both Synchronous and Asynchronous Apex to address diverse aspects of Salesforce development.
- Designed and implemented multiple complex Apex classes with callouts to SAP using REST API, ensuring seamless data integration.
- Developed Apex Classes using Future Method, Queueable Apex, Lightning Web Components to enhance the overall user experience.
- Utilized Apex HTTP callouts within Lightning Web Components to establish communication with external services using middleware (CPI), aligning with and fulfilling specific business needs.
- Implemented Apex Test Classes and engaged in debugging processes to ensure the quality and reliability of the codebase.
- Integrated Salesforce seamlessly with an External System (SAP), facilitating efficient data exchange and synchronization between the two systems.

JAN 2022 - JAN 2023

Project 2 : Implementation: Salesforce Sales Cloud

Sapours Technology Pvt Ltd, Pune

- Thoroughly analyzed business needs, translating them into detailed technical specifications and design documents.
- Managed user creation, profile setup, role assignments, and configured objects, fields, reports, and dashboards.
- Utilized tools like Data Import Wizard, Data Loader, and Workbench to ensure smooth and accurate data transfer.
- Create Validation rules, Workflows, Process builder, Flows and Approval Process.
- Ensure data privacy and user access control by customizing Profiles, Role Hierarchy, sharing rules and OWD.
- Deployment from sandbox to production environment using Change sets.
- Unit Testing, System integration testing and UAT.
- Provided ongoing technical support, promptly troubleshooting issues, and implementing enhancements and bug fixes.
- Collaborated effectively with cross-functional teams, gathering, and analyzing requirements for new features and improvements.
- Conducted thorough testing and debugging of Salesforce solutions, ensuring a robust and reliable system.
