- Languages: Python, JavaScript, HTML, CSS
- Operating Systems: Linux (Red Hat)
- Tools: VS Code, Git, Postman, Figma
- Frameworks / Libraries: Dash (Plotly), FastAPI, Flask, Faker

LANGUAGE

English

Hindi

About Me

I am currently a fourth-year B.Tech student specializing in AI and Data Science, Skilled in Python, Dash, API tools, and building simple front-end and back-end applications. With a strong passion for learning emerging technologies and creating smart, practical solutions, I am eager to find an excellent opportunity to launch my professional career in the tech industry.

PROJECTS

I completed my summer training at Salesforce as an administrator and also interned at a company, which significantly enhanced my AI skills.

- **API Mock Data Generator :-**

- Developed a Python + Dash application for API test data generation using Swagger/OpenAPI specifications.
- Implemented features such as JSON schema preview, LLM/Faker-based data generation, and Postman collection export.
- Improved UI with multi-tabs, dynamic forms, settings panel, and user login/logout features.

- **Social Media Website :-**

I created this YouTube clone website utilizing ****HTML and CSS****. It showcases a range of effective ****styles**** in CSS to elevate the site's visual attractiveness.

CERTIFICATIONS

- Salesforce :- administrative Certificate
- OS :- Linux Red Hat Certificate
- Internship :- Gen AI Internship Certificate
