PROJECTS

Boult Audio

Nov 23 - Present

- Configured Service Cloud to handle Case Management, Email to case routing.
- Build Lightning Component to used in Communities, Created Apex Controller and Trigger based on the business requirement.
- Faced a challenge enabling guest users to upload files to Salesforce case records due to security restrictions. Leveraged Salesforce's workaround, implemented a custom reference field, and followed a guide for guest user file uploads. Enabled file uploads, then used a trigger to attach files to relevant cases through the custom reference field.
- Identify, enable and modify Community Template & Theme based on design criteria.

- Used sandbox for testing. Created, change set and migrate them between Sandbox and Production environment for final implementation.
