Irene Jijo

Salesforce Developer

About Me

Highly skilled and certified Salesforce developer with a proven track record of success in the Salesforce ecosystem. With more than two years of hands-on experience, I have effectively collaborated with multiple teams to deliver tailored solutions for diverse Salesforce projects.

Work Experience

Suyati Technologies Pvt. Ltd (Aug 2021 - Present)

May 2023 - Jan 2024

Leading Global Payment Service Provider

Role: Salesforce Developer

The customer is a global payments technology company that facilitates electronic funds transfers throughout the world. As a leader in the industry, they provides innovative solutions for businesses, financial institutions, and consumers to make secure and convenient electronic payments. They leverage Salesforce CRM for comprehensive business automation and customer engagement activities.

- Ongoing client engagement involved analyzing requirements and outlining solutions.
- Developed a Client Support Portal atop the Salesforce Experience Cloud platform to facilitate seamless case creation and management for customer.
- Created a solution to monitor SLA and OLA measures for service requests across multiple geographical locations.
- Implemented a tailored business solution to support internal and partner downtime notifications.

Jan 2023 - Apr 2023

Teleion Inc

Role: Salesforce Developer

"The Climate Pledge" initiated in 2019 by Amazon, stands as a collaborative effort towards achieving net-zero carbon emissions across its operations by 2040, a decade earlier than the goals set in the Paris Agreement. Participants in this commitment pledge to consistently report their emissions, deploy decarbonization tactics, and undertake measures to offset carbon footprints.

- Executed solutions using Lightning Aura and LWC to align with project objectives.
- Prepared documentation outlining action and interaction flows for project clarity.
- Conducted rigorous unit testing to ensure the reliability of implemented automations.
- Implemented Proof of Concepts (PoCs) and customized solutions in accordance with project needs.

Technologies & Frameworks

- Salesforce Apex
- Apex Trigger
- Lightning Aura Components
- Lightning Web Components
- Asynchronous Apex
- Process Builder & Flow
- Experience Cloud
- Service Cloud
- REST API & Webservices
- RingLead
- Workbench
- Copado

Jan 2022 – Mar 2022 / Jul 2022 – Nov 2022

Terlato Wines

Role: Associate Salesforce Developer

Terlato Wine Group serves as the umbrella organization encompassing specialized ventures in the marketing and crafting of outstanding wines, spirits, and water products. Engaging in a diverse array of operations such as vineyard and winery ownership, importing, exporting, sales, and marketing, they maintain a comprehensive presence in the industry.

For managing their business operations, Terlato Wines utilizes an ecommerce application, which facilitates various functionalities including product content management with structured approval processes, product information, and also use Salesforce platform for automations like case management.

- Prepared technical implementation documentation.
- Handled certificate and key renewals for domain maintenance.
- Developed Lightning components to improve system functionality and user experience.
- Created informative reports and interactive dashboards for key metrics analysis.

Apr 2022 – Jun 2022

GES (Global Experience Specialists)

Role: Associate Salesforce Developer

GES, a global event management company, utilizes Salesforce Sales Cloud for automating their sales processes. This includes monitoring opportunities and approvals, configuring forecasting, estimating revenue, tracking loss reasons, converting record types, and resolving duplicate records

- Engaged with the client to grasp and analyze project requirements.
- Implemented Salesforce customizations to address project needs.
- Utilized RingLead for migrating legacy data seamlessly.
- Prepared documentation outlining action and interaction flows.
- Conducted comprehensive unit testing of the automated processes.
- Developed Apex Trigger based automations to facilitate data merging functionalities.
