Project Description:

Project: Sales Process Automation (Quality Assurance Focus)

Ensured the seamless implementation of a sales automation system by conducting comprehensive quality assurance testing across lead management, CRM integration, and workflow automation. Validated functionality, data integrity, and performance efficiency to optimize user experience.

CES PVT LTD FEB 2018 - FEB 2020

Role: Business Development Consultant Description: Experienced in managing the full sales cycle remotely, from lead generation and qualification to closing deals. Skilled in building client relationships through phone, email, and virtual meetings, while maintaining detailed records in CRM systems. Adept at understanding customer needs, presenting tailored solutions, and collaborating with cross-functional teams to drive revenue growth.	Key Skills: Sales, Client Relationship Management, CRM, Lead Generation, Virtual Sales, Negotiation, Communication, Problem Solving, Team Collaboration.
---	--

ROLES AND RESPONSIBILITIES: SALESFORCE QA

- Developed and executed comprehensive test plans aligned with real estate business processes, ensuring robust coverage of **sales (Lead to Closure)** and **service (Case Management)** workflows within **Salesforce Sales Cloud and Service Cloud**.
- Analyzed and interpreted complex business requirements specific to real estate transactions, property management, and customer engagement workflows, ensuring clarity and completeness through close collaboration with stakeholders.
- Designed, developed, and maintained detailed test cases, test scripts, and test data, focusing on critical real estate functionalities including lead management, opportunity tracking, case resolution, and client communication.
- Extracted and validated migrated data using **Salesforce Object Query Language (SOQL)**, verifying data mapping accuracy and integrity during system integrations and migrations.
- Experience Using **CRT** to validate the implemented functionality for **Case Management**. Performed manual and automated testing to validate application functionality, system reliability, and user experience across multiple platforms.
- Utilized Selenium to automate critical workflows such as record creation, updates, validations, and field verifications, enhancing testing efficiency and accuracy.
- Identified, documented, and managed software defects using **JIRA**, ensuring effective tracking, prioritization, and closure of issues in collaboration with development teams.
- Conducted thorough regression testing to safeguard against unintended impacts from new releases and system enhancements.
- Evaluated Salesforce UI for consistency, usability, and functionality, delivering a seamless user experience for real estate agents, property managers, and customers.
- Configured **Github** and **Azure DevOps**. Managed deployment activities from Dev Org to QA Org utilizing Change Sets and Azure DevOps pipelines, ensuring smooth transition across development and testing environments.
- Maintained meticulous documentation of test cases, test results, defect logs, and testing progress reports to support auditability and continuous improvement initiatives.
- Provided regular updates on testing progress, quality metrics, and release readiness to project stakeholders and leadership teams.
- Continuously updated knowledge of Salesforce platform enhancements, testing methodologies, and industry best practices to optimize QA processes and deliver high-quality software solutions.

ROLES AND RESPONSIBILITIES: BUSINESS DEVELOPMENT CONSULTANT

- Remote Selling: Engage with prospects and customers via phone, email, or virtual meetings to drive sales without face-to-face interaction.
- Lead Qualification: Assess inbound leads, identify potential opportunities, and nurture them through the sales funnel.
- CRM Management: Maintain accurate records of customer interactions and sales activities using tools like Salesforce or HubSpot.
- Product Knowledge: Provide detailed information and demonstrations of products or services to address customer needs and objections.
- Face-to-Face Engagement: Meet clients in person to present products, build relationships, and close deals.
- Customer Relationship Building: Develop long-term relationships with clients to encourage repeat business and referrals.
