Experience

Salesforce Developer | May 2022 – Present

Infosys | Bangalore

- Experienced in developing and administering the project to customize Salesforce applications and implement business logic.
- Delivered the business requirements through Salesforce Configurations (Object & Field creation, Lightning record pages, Page Layouts, Permissions Sets etc.)
- Developed SOQL and SOSL queries to get data from different related objects.
- Collaborated with stakeholders/clients to gather and analyze business requirements.
- Worked on Process Builder, Flows, Apex classes, Triggers, web Services, and LWC for the project by Salesforce best practices.

Project

Salesforce Project | July 2022 – Present

- I was responsible for all code-based solutions within Salesforce or involving data migrations, system integrations and 3rd party applications.
- Developed and managed project plans, timelines, and budgets for a complex Salesforce implementation, resulting in successful on-time and within-budget delivery.
- Coordinated with stakeholders, including executives, business users, and IT teams, to ensure alignment and project success, resulting in a high level of stakeholder satisfaction and adoption.
