PROFESSIONAL SUMMARY

Accomplished Salesforce Developer/Lead with 5+ years of experience designing, developing, and implementing scalable and secure Salesforce solutions. Proven ability to translate complex business requirements into efficient Apex code, interactive Lightning Web Components, and automated workflows. Skilled in data management, integrations, and leading successful Salesforce projects from concept to deployment

SKILLS

- Proficient in Salesforce development - **Apex, Lightning Components**
- Experience with **Salesforce integrations, REST APIs**
- Knowledge of Salesforce CRM functionalities and **configurations**
- Strong understanding of Salesforce **data modeling and management**
- Expertise in Salesforce automation like **Workflows, Process Builder, Flows**
- Familiarity with Salesforce DX, Salesforce CLI, and version control (Git), VS Code
- Excellent problem-solving and debugging skills.
- Strong communication and teamwork abilities.

PROFESSIONAL EXPERIENCE

ASSOCIATE IT CONSULTANT | ITC INFOTECH | HYD, IN

2022 – Present

- Led the end-to-end implementation of a **Service Cloud Application**, including discovery, design, development, QA, UAT, and go-live phases.
- **Developed** custom Apex classes for SLA and business hour calculations, ensuring efficient case management.
- **Enhanced** user productivity by creating **reusable** macros and **automated** workflows (Screen, Auto-Launched, Scheduled) to streamline processes.
- **Implemented** robust **data models** and designed **interactive dashboards** to track key performance indicators (KPIs) like case resolution times and volumes.
- **Built** custom **Lightning Web Components (LWC)** with pagination functionalities for user surveys, leveraging refreshApex for seamless data updates.
- **Configured** user profiles, permission sets, and page layouts to enforce data security and access controls.

ASSOCIATE DEVELOPER | VUNIQUE SOLUTIONS | BAN, IN

2018 – 2022

- **Streamlined** business workflows by **optimizing** existing Salesforce functionalities with Flows and Process Builders.
- **Collaborated** with stakeholders to gather requirements, design solutions, and ensure successful implementations.
- **Developed** well-tested Apex classes (including test classes), scheduled and batch classes, adhering to best practices for code efficiency.
- **Integrated** Salesforce with external systems using **Named Credentials** and **External Services** to retrieve real-time data via REST APIs.
- **Migrated** data from Zendesk to Salesforce, including attachments and parent-child ticket relationships, using Apex callouts.
- **Maintained** and **optimized** Salesforce orgs, performing deployments, backups, and regular system maintenance tasks.
- **Demonstrated** strong Salesforce administration skills with tools like Flows, Approval Processes, and Data Loader.
