Trailhead

Active Trailblazer and Mountaineer with 39 Badges, 5 Trails, 2 Super badges, 63,500 Points.

Projects Profile

Project 1:

Project Title : Apex CPQ Time Limit Error Removal: Flow Migration
Business : Kaseya
Platform : workflows, process builder, flows

Project Overview:

The scope of the project is to merge all the workflows and process builders into flows, creating automations aligned with current business requirements. This initiative aimed to reduce the occurrence of apex CPQ time limit errors across diverse business scenarios while enhancing organizational cleanliness in a more efficient manner.

Roles and Responsibilities:

- In this project, merged 8 to 10 workflows into a single flow which helps the business to run effectively.
- Every week should deploy the production activities without fail.
- Resolutions of requests should be quick as much as possible.
- Should be focused on production key business scenarios to protect business/sales rep's process.
- Should support the production support team wherever required.

Project 2:

Project Title: : Debook subscriptions and Debook/rebook device transfer
Business : Kaseya
Platform : Configuration, Apex Classes, Batch Apex, Apex Triggers, LWC, SOQL, HTML, CSS, JavaScript

Project Overview:

There are multiple business requests to cancel the subscriptions and device transfers from one customer to another customer. To reduce the sales ops efforts, we built a component on lightning app to run the process backend automatically.

Roles and Responsibilities:

- Prepared Business Requirement documents and demonstrated the User Stories to the client and worked on the feedback provided by the customer.
- Peer-reviewed the code and did technical reviews to log review comments.
- Developed and Enhanced Apex Classes, Apex Triggers, Quick Actions, Lightning Aura Components to establish a remote connection between Salesforce and Instruments.

- Created validations to be validated while data synchronized between salesforce and remote devices.
- Created new fields and relationships in both standard and custom objects as per requirements.
- Optimized SOQL queries to control governor limits and code refactoring to do the null checks in the existing code.
- Created page layouts, record types to organize fields, custom links, related lists and other components on record details and edit pages.
- Should support the production support team wherever required.

Project 3:

Project Title: : **Calculating Total no of licenses from subscription and populating on MaxNet telemetry records**

Business : Kaseya

Platform : Configuration, Apex Classes, Batch Apex, Apex Triggers, LWC, SOQL, HTML, CSS, JavaScript

Project Overview:

Compliance manager product business team wants to see the product utilization, means how many total licenses are consuming out of total licenses deployed synced between salesforce and product portal.

Roles and Responsibilities:

- Prepared Business Requirement documents and demonstrated the User Stories to the client and worked on the feedback provided by the customer.
- Peer-reviewed the code and did technical reviews to log review comments.
- Developed and Enhanced Apex Classes, Apex Triggers, Quick Actions, Lightning Aura Components to establish a remote connection between Salesforce and Instruments.
- Created validations to be validated while data synchronized between salesforce and remote devices.
- Created new fields and relationships in both standard and custom objects as per requirements.
- Optimized SOQL queries to control governor limits and code refactoring to do the null checks in the existing code.
- Created page layouts, record types to organize fields, custom links, related lists and other components on record details and edit pages.
- Should support the production support team wherever required.

Co-Curricular Activities

- Participated in GGSY, Hands on training of solar study lamp assembly conducted by IIT Bombay.
- Participated in Kaseya cricket league.
