WORK EXPERIENCE

Accenture

Senior Salesforce Developer

Aug 2021 - Present

- Developed custom Apex classes, triggers, and Lightning Web Components (LWC) for business-critical applications.
- Worked on asynchronous processing to handle large-volume data operations and optimize performance.
- Implemented integrations between Salesforce and external systems for real-time and scheduled data exchange.
- Configured Salesforce metadata — including Objects, Fields, Record Types, Page Layouts, and Validation Rules — along with Profiles, Permission Sets, and Sharing Rules to enforce data security and ensure compliance.
- Acted as Release Coordinator for deployments using Copado, Git and Bitbucket across multiple environments.
- Provided support for incident resolution and handled configuration requests raised by business users.
- Created internal documentation and facilitated knowledge-sharing sessions within the development team.
- Recognized with a promotion from Associate to Analyst for consistent performance and delivery excellence.

EDUCATION

Government College of Engineering Amravati

Bachelor of Technology (ENTC) - 8.01

August 2017 - June 2021

PROJECTS

Customer Communication Preferences Management

- Designed the architecture covering Salesforce UI, backend logic, and REST API integration.
- Built a configurable, responsive LWC to allow users to view, update, and manage preferences in real time.
- Integrated with GET, PUT, and POST APIs for retrieving and updating preferences, ensuring 100% real-time synchronization with the external system.
- Implemented automation for response handling, error tracking, and retry mechanisms, reducing manual intervention by 60%.

Scheduled Transactional Records Processing

- Developed Async Apex jobs to process large volume of records daily for data enrichment, validation, and reporting.
- Scheduled automated jobs to run during non-peak hours, reducing system load and improving overall org performance by 35%.
- Applied bulkified logic and optimized SOQL queries to ensure governor limit compliance in high-volume transactions.
- Implemented Apex Triggers to automate record creation, updates, and relationship management without manual intervention.

SKILLS

- **Salesforce Platform:** Apex, Triggers, Async Apex, LWC, Flows, Metadata, Data Security Model
- **Tools & DevOps:** VS Code, Bitbucket, Copado, Salesforce Inspector, Salesforce Lightning, Data Loader
- **Development Practices:** Agile, Scrum, Jira, Deployment Management, Confluence Documentation

CERTIFICATE

- Salesforce Platform Developer I
- Salesforce Administrator
- Salesforce App Builder
- Salesforce Sales Cloud Consultant
- Salesforce CPQ Specialist
- Salesforce AI Associate

AWARD

- **Delivery Champion Award** – Recognized by client for excellence in delivery execution.
- **Best ASE Recognition** – Awarded by Accenture for consistent high performance.
