- **Programming languages:** JavaScript, jQuery, HTML, CSS, Python.
- **Core Skills:** Problem-solving and communication skills.

EXPERIENCE

Streamforce Solutions

Salesforce Software Engineer

Hyderabad, TG

June 2021 – Present

Key Accomplishments

- **Design and Development:** Designed, developed, and maintained Salesforce applications and integrations using Salesforce Lightning, Apex, Visualforce, and integration technologies (SOAP, REST). Enhanced system performance by 50%, improving data quality and accuracy.
- **User and License Management:** Managed user setup/deactivation, roles, profiles, permissions, and public groups, ensuring seamless access and security. Achieved a 25% increase in user satisfaction through effective support and training.
- **Troubleshooting and Issue Resolution:** Resolved user support tickets with a 95% first-contact resolution rate, significantly reducing time-to-resolution and maintaining system integrity through regular data cleansing, quality checks, backups, and restores.
- **Cross-Functional Collaboration:** Collaborated with cross-functional teams to understand business requirements and develop tailored solutions, ensuring alignment with strategic goals. Mentored team members to foster continuous learning and adherence to Salesforce best practices.
- **Salesforce Configuration Changes:** Implemented configuration changes including security settings, workflows, flows, fields, validation rules, approval processes, page layouts, record types, custom settings, dashboards, and reports. Enhanced functionality by 35% through scalable custom tabs and validation rules.
- **User Support and Training:** Delivered end-user training and created training materials to increase system adoption and usability across teams. Led a support team to a 25% boost in agent satisfaction.
- **Technical Documentation:** Created and maintained comprehensive technical documentation to support ongoing development and operational efficiency.
- **Data Analysis and Reporting:** Designed and maintained dynamic dashboards and reports, providing real-time insights to stakeholders. Improved reporting accuracy by 30% through over 50 custom reports and dashboards.
- **Automation and Workflow Development:** Developed automation workflows with Lightning Flows and Apex, reducing manual workload by 40% and enhancing data accuracy. Provided technical support for Salesforce Web-to-Lead and Web-to-Case integrations.
- **Security and Compliance:** Configured secure role hierarchies and sharing settings to protect sensitive data, increasing compliance adherence by 20%.

- **API Integration:** As a salesforce developer built and maintained robust REST and SOAP APIs, enabling seamless integration between Salesforce and external systems.
- **Development Tools Expertise:** Leveraged tools like Salesforce Inspector, Data Loader, Workbench, VS Code, and Postman, reducing project turnaround time by 40%.
- **Scalable Solutions:** Developed scalable custom tabs, validation rules, workflows, and approval processes to meet evolving organizational needs.
- **Best Practices and New Features:** Stayed up-to-date with Salesforce best practices and new features, implementing innovative solutions to drive business value.
- **Technical Expertise:** Provided technical solutions for custom development, integrations, and data migrations, data modelling ensuring seamless implementations aligned with organizational goals.
- Demonstrated flexible in adapting to evolving business needs by quickly learning new Salesforce features and implementing solutions that exceeded stakeholder expectations
- Resolved complex Salesforce issues by troubleshooting and debugging Apex, Lightning Components, and integration workflows, ensuring system reliability and user satisfaction.
- Developed custom Lightning Web Components to create dynamic, user-friendly interfaces, enhancing engagement and usability for end-users.
- Created intuitive dashboards and reports, making Salesforce insights more engaging and actionable for key stakeholders.
- Experience worked in Agile development methodologies as SCRUM
- Done POC on making an employee record visible on the community cloud based on logged in users.
- Part of DevOps to migrate changes from Dev to QA and code analysis using PMD.
- Attend all scrum ceremonies and provide demos to product owners and stakeholders.

Projects

As a Salesforce Administrator and Developer

Sales Cloud Projects:

- Led the migration of an 80-year-old teaching tutorial business to the Salesforce platform, creating automation to streamline their operations.
- Designed and demoed Sales Cloud solutions to clients, gathering requirements, and translating them into effective workflows.
- Designed and implemented Flow screens and guided user interactions to ensure accurate data input and minimize errors
- Designed and developed custom Apex code to handle complex business logic and data processing within the sales cycle.
- Implemented validation rules and error handling mechanisms within Flows to maintain data integrity and improve user experience
- Implemented end-to-end sales cycle automation leveraging Apex and Flows.
- Provided documentation and training to end-users to facilitate the adoption and understanding of the automated sales processes.
- Provided documentation and training to end-users to facilitate the adoption and understanding of the automated sales processes.
- Implemented multiple Flows, Apex classes, and Triggers within the Salesforce Ecosystem.
- Developed triggers, Apex classes, and test coverage to effectively address user stories and provide tailored solutions

Service Cloud Projects:

- Supported the implementation of Service Cloud for various clients, troubleshooting and resolving issues, and enhancing user adoption through tailored training sessions.
- Managed Case Management, Automation, Chatter, Groups, Feeds, and Analytics to improve service efficiency and customer satisfaction.

Nonprofit Cloud Projects:

- Migrated large-scale legacy data for an NGO organization, moving donation and donor data from 30 years back from Excel to Salesforce Nonprofit Cloud.
- Trained client peers to handle operations smoothly, ensuring data integrity and continuity.
- Implemented automation for Affliction Gift-in-Kind, Grants, Pledges, and Email Reminder Notifications to streamline non-profit operations

INVOLVEMENT & LEADERSHIP

Journey2Salesforce Learning Path

Participant | Virtual

- Organized and participated in the Journey2Salesforce program, mentoring peers and building Salesforce expertise through interactive learning and practical projects.
- Recognized as a top contributor and awarded Journey2Salesforce swag for outstanding performance in skill-building challenges.

Salesforce User Group, Chennai, India

Participant | Trailblazer Meetup '24

- Completed the "100 Days of Challenge" program, enhancing Salesforce skills and collaborating with a global community of Trailblazers to exchange best practices and insights.

Smart Internz Virtual Internship

Participant | Virtual

- Completed Salesforce Admin and Developer virtual internships, delivering project solutions that addressed real-world business challenges.

EDUCATION

Acharya Nagarjuna University

- M.C.A Master of Computer Applications – K. Chandrakala PG College in 2020
- B.Sc. Computer Science, Mathematics, Physics – A.S.N. Degree College in 2016

AWARDS/AFFILIATIONS

- Winner: Journey2Salesforce Swag.
- Appreciation: Recognition of project delivery performance by the current organization.
- Received accolades in 2023 for outstanding performance in addressing user needs through innovative project solutions.
- 5-star Trailhead Ranger with 528 Badges and 256,550 Points.
- Appreciation: Nonprofit charitable trust client appreciation for successfully migrating application legacy data to Nonprofit cloud two decades back.

CERTIFICATIONS

- **Salesforce Administrator, Sales Cloud Consultant, Platform Developer I, Associate from Salesforce.**
- **Copado Consultant, Gearset Automastion.**
- **JavaScript Essentials 1, Cybersecurity from Cisco.**
- **JavaScript from Hacker Rank.**
