- proficiently managed and customized Salesforce Mobile App for optimized user experience and functionality.
- Experienced in Sales Cloud, Experience Cloud (Community) and Service Cloud
- Adeptly crafted detailed reports and dashboards in Salesforce, leveraging data analysis for insightful presentations and informed decision-making.
- Proficiently executed data import processes in Salesforce using a variety of tools to ensure accurate and efficient data management.
- Demonstrating extensive expertise in Salesforce deployment, ensuring the smooth and efficient implementation of changes across environments.
- proficiently engaged in the development and implementation of diverse Salesforce flows to enhance automation capabilities.
- Experience On SOSL and SOQL queries
Apex (Synchronous and Asynchronous)
- Developed distinct Visualforce pages to generate customized invoices based on varied conditions

Projects :

BloomChemAG

Architected and implemented a bespoke business management solution on the Salesforce platform, tailored to facilitate dynamic interactions between suppliers and customers across global markets. Orchestrated diverse sales strategies by suppliers and purchase transactions by customers, while intricately managing calculations. The project, operating on a platform-based license, demanded extensive customization for heightened efficiency and alignment with Salesforce best practices..

SmartPoint

Implemented inventory management for product stock maintenance, facilitated product sales, administered user accounts, and tracked user locations within the project scope.

CleanCorp

Developed customized reports and dashboards aligned with project specifications to meet the distinct needs of various user roles. Implemented diverse flows tailored to specific requirements and demonstrated proficiency in Quote Cloud and Zapier integrations within the Salesforce environment.

Order Management

Oversaw the intricacies of order calculations for both suppliers and customers, customizing quotes to accommodate diverse conditions. Additionally, implemented robust user security measures within the Salesforce environment.
