Technical Summary

Full-Stack Developer with hands-on experience building responsive web applications using MERN stack. Proficient in React.js, Node.js, and modern JavaScript frameworks with strong foundation in Data Structures, Algorithms, and Object-Oriented Programming. Demonstrated ability to optimize application performance, enhance user experience, and deliver user-centric solutions. Passionate about writing clean, maintainable, scalable code and solving complex technical challenges through innovative approaches.

Technical Skills

Programming Languages: C, C++, JavaScript, SQL

Web Technologies: React.js, Redux Toolkit, Node.js, Express.js, MongoDB, HTML5, CSS3, Tailwind CSS

Developer Tools: Git, GitHub, VS Code, Postman, Chrome DevTools, Git Bash

Core Competencies: Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Agile Development, Responsive Web Design

Education

Silicon University — B.Tech in Computer Science & Engineering

Nov 2022 – 2026

Bhubaneswar, India

Adyant Higher Secondary School — Senior Secondary Education

2019 – 2021

Bhubaneswar, India

Professional Experience

Full-Stack Web Developer Trainee — CODE BEAT, Bhubaneswar

Jun 2024 – Jul 2024

- Developed and deployed web applications using MERN stack (MongoDB, Express.js, React.js, Node.js)
- Built responsive UI components using React.js and modern CSS frameworks, ensuring cross-browser compatibility across Chrome.
- Collaborated with 5-member development team using Agile methodology and Git version control for efficient code management and peer reviews

Front-End Developer Intern — Squibix Digital, Bhubaneswar

Aug 2023 – Sep 2023

- Designed and developed responsive web interfaces using React.js, HTML5, CSS3, and JavaScript
- Built 15+ reusable UI components following component-based architecture, reducing code redundancy
- Enhanced user experience through performance optimization and comprehensive cross-browser testing
- Participated in code reviews and implemented feedback to improve code quality and maintainability

Technical Projects

Healthcare Appointment System — React.js, Tailwind CSS, Context API, JavaScript GitHub — Live Demo

- Built a healthcare appointment booking platform enabling users to browse doctors, filter by specialization, and book available time slots
- Implemented dynamic slot selection and booking confirmation workflow using **Context API** for global state management
- Added client-side validation and user-friendly alerts to prevent invalid booking submissions and improve UX
- Designed intuitive and clean UI with **100% mobile responsiveness** using Tailwind CSS, ensuring smooth experience across devices
- Optimized component reusability by separating UI into modular components (Navbar, DoctorCard, BookingForm, SlotPanel)

Food Ordering Application — React.js, Redux Toolkit, Tailwind CSS

GitHub

- Developed a full-featured food ordering web application with product listing, cart management, and dynamic billing summary
- Implemented global state management using **Redux Toolkit** for add-to-cart, remove-item, quantity updates, and total price calculation
- Created reusable UI components (FoodCard, CategoryFilter, CartItem, CheckoutSummary) to improve maintainability and scalability

Achievements & Certifications

- Codekaze 2024:** Secured an All India Rank of **312** in a national-level coding competition. [View Certificate](#)
- NPTEL Certification:** Successfully completed *The Joy of Computing Using Python*. [View Certificate](#)
