Package Application Development Analyst

PG&E- Pacific Gas and Electric Company Re-design & Re-platform

Gurugram, India

Aug 2022 – Present

- As a Salesforce & Vlocity Developer to Pacific Gas & Electric Project. I primarily worked in Salesforce Industries & Salesforce Core Development with Salesforce **Omnistudio**, LWC (**Lightning Web Components**), **Apex** and **Rest API Integration** to re-design and re-platform the existing application on **Salesforce Experience Cloud**.
- I worked on creating new features from scratch by using **Omniscrypts**, **Flexcards**, Lightning Web Components (**HTML**, **JavaScript**, **CSS**) for the User Interface and **Integration Procedures**, **Data Raptors** & **Apex** for the backend to improve the design and enhance the **backend efficiency**. I worked on **OWD**, **Profile settings** & **Permission sets** and **community user settings for the project security**.
- I also worked for designing **Community Site on experience cloud** and configurations, **PDF creation using VisualForce Pages**, Apex controller classes. **Deployment of the components using Copado** as per the project requirement.
- I have played crucial roles in resolving blockers & bugs in features, connecting with onshore architects, and demoing the features to the onshore teams and client. I have proactively worked with new joiners for giving them proper KT.
- Through my collaborative approach, **multi-tasking skills**, **strong technical skills**, friendly team bonding and dedication to delivering quality results, I have made significant contributions to the success of Pacific Gas & Electric project.
