PROJECTS

Employee Recognition System. Employee Performance and Recognition Portal is an online Performance Appraisal and Recognition system used by all the employees in different sections of the company. This portal is a one stop shop for all the employees to provide details like tasks performed and performance measures improved etc to their superiors. Used Oracle as database, Weblogic as a middleware for exchange of request from backend to frontend, JDBC for database connectivity, JSP for making server pages for the project. The aim of the Project is goal management.

Quiz Application using Java Swing and AWT. This is a quiz based game where we have no. of questions, a person will answer and at last he/she will get the result of how many question answers correctly.

Employee CRUD. Employee Crud made using SpringBoot. Each api is made for each crud operation.

Patient Registration(JSP, JDBC, MySQL), Todo List(JDBC, MySQL).
