PROFILE

A motivated Master of Computer Applications candidate with a background in commerce, bringing strong analytical and problem-solving skills to software development. Proficient in Core Java, PHP, MySQL, and front-end technologies. Eager to secure an entry-level developer role to contribute to building innovative and efficient software solutions.

EDUCATION

2023 - 2025
MANGALYATAN UNIVERSITY
Master of Computer Applications (MCA)

2020 - 2023
M.D.S UNIVERSITY
Bachelor of Commerce (B.Com)

PROJECTS

- **Hotel Management Demo Offline Software**
Java (JDK 8)
 - Developed a desktop application to manage room bookings, guest check-in/checkout, and billing.
 - Implemented Object-Oriented principles to model entities like 'Guest', 'Room', and 'Booking' for robust code.
 - Designed and integrated functionality for generating and printing customer invoices.
- **Hospital Management Demo Website**
PHP, MYSQL, HTML, CSS, JavaScript
 - Built a dynamic patient portal allowing users to schedule, view, and cancel appointments.
 - Developed a secure administrator dashboard for staff to manage doctor availability and patient records.
 - Created a responsive front-end ensuring a seamless experience across desktop and mobile devices.
- **School Management Demo Website**
PHP, MYSQL, HTML, CSS, JavaScript
 - Engineered a multi-user system with distinct roles (Student, Teacher, Admin) and secure login.
 - Designed a feature for teachers to upload grades and attendance for students to personal dashboards.
