Location: Chengannur, Alappuzha, Kerala

Professional Summary

Dedicated and detail-oriented **Salesforce Developer** with **1+ year of hands-on experience** in Salesforce Service Cloud applications. Strong expertise in **Salesforce configuration, Apex development, and Lightning Web Components (LWC)** with a solid foundation in functional testing and deployment support. Proven ability to collaborate with cross-functional teams, resolve defects, and deliver scalable Salesforce solutions aligned with business requirements.

Technical & Soft Skills

- Salesforce Configuration
- Salesforce Service Cloud
- Apex Programming
- Lightning Web Components (LWC)
- Salesforce Administration
- Functional & User Acceptance Testing
- Basics of Java
- Bug Fixing & Enhancements
- Deployment & Release Support
- Problem Solving
- Communication Skills
- Teamwork & Collaboration

Work Experience

Salesforce Developer

Nov 2023 – Jan 2025

Impagtive Technologies India Private Limited

Kochi, Kerala

- Developed and tested **Salesforce Service Cloud** applications with a focus on case management, workflows, and automation.
- Conducted functional testing to validate business requirements, performed bug fixes, and supported enhancements across multiple development cycles.
- Collaborated with cross-functional teams using Agile methodology to deliver Salesforce solutions on schedule, handling user stories and configuration changes.
- Configured custom objects, validation rules, page layouts, and permission sets while performing issue analysis and root-cause identification to improve system stability and user experience.

Projects

Maximal Sequence Generator using FPGA (Mini Project)

Technology: FPGA, Digital Communication

- Designed and implemented an FPGA-based maximal-length sequence generator applying core digital communication principles.
- Verified sequence accuracy and system performance through simulation and hardware testing.

Smart Walker

Technology: Embedded Systems

- Developed a smart walker providing real-time assistance with sensor-based movement detection.
- Enhanced user safety by integrating embedded components for stability monitoring and responsive alerts.
