Arrive Logistics:

Overview: AFS Logistics is Australia’s premier logistics and freight management solutions provider, serving over 80 leading brands across multiple categories nationally and internationally.

Responsibilities and Contributions:

- Played a key role in configuring user access, roles, profiles, and security settings, ensuring adherence to best practices in Salesforce security.
- Developed custom objects, triggers, and workflows to address specific functional needs within the application, enhancing system flexibility and efficiency.
- Led the design and implementation of Apex Triggers and flows to automate business processes and streamline operations.
- Conducted data mapping and migration activities, seamlessly transitioning data from legacy systems to Salesforce objects and fields.
- Utilized modern Salesforce development technologies, including Lightning components developed with both Aura and Lightning Web Components.
- Customized page layouts for Contacts, Accounts, and cases based on client requirements, optimizing user experience and workflow efficiency.
- Demonstrated proficiency in test writing, component deployment, and issue resolution, ensuring the reliability and stability of the Salesforce environment.

Kinela HealthCare System:

As a Salesforce Developer at Kinela. I played a pivotal role in the development and enhancement of a comprehensive healthcare platform aimed at empowering individuals living with disabilities and older Australians to take control of their health and well-being. The Kinela platform offers personalized health programs, home-delivered nutritious meals, and allied health services, including dietetics, speech pathology, and occupational therapy.

Responsibilities and Contributions:

- Developed and implemented custom solutions to support Kinela's healthcare platform, facilitating personalized health programs, home-delivered meals, and allied health services.
- Built entire forms and designed custom objects and fields to align with business requirements.
- Developed and maintained Apex classes, triggers, and Visualforce pages, ensuring smooth functionality and adherence to business logic.
- Created comprehensive test classes to achieve maximum code coverage and ensure the reliability of Salesforce implementations.
- Utilized Data Loader and Import/Export wizard for efficient data import and mapping to CRM objects. Developed Lightning components using both Aura and Lightning Web Components frameworks to enhance user experience and streamline processes.
