Professional Profile

Highly motivated software engineer with 2+ years of experience with the Salesforce ecosystem and possessing working knowledge on various CRM platforms. Actively involved in varied capacities from Required Analysis, Development, Testing, Deployment and being a certified Salesforce Administrator, and can contribute to the project in many ways. Adapt to working in Agile and Waterfall methodologies.

Professional Experience

INFOSYS LIMITED

SYSTEM ENGINEER

JUN 2021 – JAN 2024

Roles and Responsibility:

- Development/Integration: Design and develop custom solutions using Apex, Visual Force, Lightning Components, and integrate Salesforce with other systems, which may involve using Salesforce APIs
- Salesforce Configuration: Ability to configure and customize Salesforce environments, including setting up custom objects, fields, workflows, and business processes and ensuring best practices are followed.
- Collaborate with cross-functional teams to gather and analyze business requirements, design solutions, and implement them in Salesforce Marketing Cloud and perform peer code reviews.

Deliverable:

- Experience in Salesforce Development using Apex Programming language, Apex Classes, Apex Triggers, Batch Apex, Lightning Component (Aura), Visual force Page and Lightning Web Component. Developed in writing unit test cases. Worked on configuration, security, and security controls aspects of Salesforce.
- Proficient in Salesforce Administration skills such as designing Custom objects, Custom fields, page layouts, Record Types, Lightning Pages, Custom tabs, Validation rules, Reports and Dashboards, and various other components as per the client and application requirements.
- Designed, developed, and tested automation workflows and created them with end-user documentation.
- Ability to manage data import/export operations using tools like Data loader and data import wizard. Import and export are used to delete or insert the fields of records in a set of Salesforce application requirements.
- Strong experience in code promotion/ Deployments to SIT/UAT and Prod using the GitHub.
- Experience with Sandbox refreshes and post-refresh activities.
- Analyzed and resolved conflicts related to the merging of source codes for Git.
- Worked with all Dev, QA, and systems engineering groups to handle and automate the process.
- Responsible for branching and merging the codes as per the schedules.
- Experience in CI/CD pipelines with Branching Strategy techniques.
- Assure the quality of the automation QA processes

- Working with Business analysts, Scrum Masters, QA Analysts, Product Owners, and other cross-functional resources to define and deliver that can be implemented.
- Responsible for planning and scheduling the Prod deployments, preparing the release schedules, and communicating with different teams.
- Proactively identify and mitigate risks and remove obstacles to deployment.
- Experience working with external clients/ end-users and lines of business.
- Well-versed with both Agile and Waterfall methodology of Software Development Life cycle
- Knowledge of Object-oriented methodologies and approaches.
- Strong understanding of Salesforce security, User Roles, Profiles, Permission sets, Public groups sharing settings, sharing rules, OWDs, and Field level security.

Education

- Bachelor of Engineering, Computer Science, Paavai Engineering College, Namakkal, Tamil Nadu

Certifications:

- Salesforce Certified Administration (ADM 201)
