EXPERIENCE

Insurance Marketplace - Salesforce Developer

OCT 2023 - PRESENT

Description:

The client is an insurance marketplace that offers free, no-obligation Medicare consultations with licensed insurance agents to discuss insurance options, like Medicare Advantage, Medicare Supplement, Prescription Drug Plans, Final Expense, Hospital Indemnity Insurance, and Vision & Dental Insurance. The company requirement was to implement the Sales Cloud in a website with Gamified UI using Experience Cloud.

Key Deliverables:

- Interacted and communicated with the client to understand the business requirements
- Created a custom login UI in Lightning Web Components for Experience Cloud with gamified engagement.
- Created custom "Forgot" and "Reset Password" pages alongside the login page for agent password management.

- Custom email notifications for agent registration and password resets will be designed and implemented.
- Designed custom Opportunity object with two-way sync to standard Opportunity using triggers and handler classes.
- Created gamified custom record detail pages for Opportunity and Account objects in Experience Cloud using Lightning Web Components.
- Developed test classes, and cases, and conducted unit testing to ensure the Experience Cloud site meets clients' requirements.
- Implemented SSO configuration for seamless agent access across multiple Experience Cloud sites with a single login.
- Incorporated Account and Opportunity screen flows into LWC component, enhancing UI with gamified design per client's request.

Custom Sales Territory Management - Developer

MAR 2023 - SEP

2023

Description:

The firm is a motor company that manufactures solar-powered sports cars. They have experienced exponential sales growth after releasing their hit *Model F* solar-powered sports car. They employ a sales team that sells vehicles to auto dealers across the United States. Each sales representative has a territory of one or more zip codes. Sales reps own the relationship with all auto dealers in their zip code territories.

Key Deliverables:

- Interacted and communicated with the client to understand the business requirements
- Created a technical solution with an estimated time for the requirement
- Worked around Account, Opportunity, and contact object of automobile
- Created a new custom object Territory with field zip code, territory owner
- Created a record-triggered flow on Account to update zip codes as per requirement
- Edited existing trigger handler class to throw an error on exceeding the limit of sales representatives for an Account
- Created schedule apex class to run every midnight to check for required owner assignments.
- Created automation using flow to send email alerts to both previous and current owners on account owner changes.
- Created test cases with 90% code coverage to verify the desired functioning of the application

EDUCATION

Bachelor of Technology in Electrical Engineering (Asansol Engineering College, 8.4 DGPA)
