PROFILE

- Having a total of 2 years 10 months of experience with a proven track record of success in developing and implementing Salesforce methodologies and techniques as per industry standards.
- My future goal is to continue expanding my expertise in Salesforce and contribute to innovative projects.
- Scaling new heights of success and leaving a mark of excellence which involves professional growth. Ability to produce outstanding results individually and as a part of a team.

OVERVIEW OF TECHNICAL SKILLS

As a Salesforce Developer, I am responsible for developing and implementing Salesforce solutions for clients. My key responsibilities include:

- Hands on experience in analysis and design of customer requirements.
- Experience in SFDC development using Lightning Web Components, Apex classes, Triggers, SOQL.
- Working knowledge of implementation of Objects, Page Layouts, Validation Rules, Lightning Flows, Approval Processes, Reports and Dashboards, Custom Setting, Custom Metadata type, Record Types, Email Templates, Lightning App Builder.
- Collaborating with cross-functional teams to gather requirements, design customizations, and develop solutions that meet client needs.
- Strong Exposure to Flows and its types.
- Extensive experience in Sales Cloud.
- Experience in data migration using Data Loader, Salesforce.com and Import wizard.
- Performing testing and debugging to ensure the quality and functionality of Salesforce solutions.
- Providing technical support and training to end users to ensure successful adoption and utilization of Salesforce.
- Familiar with basic knowledge of Integration and Web Services like REST APIs and HTTP callouts.
- A team player with good communication skills, ability to learn and deliver on time. Capable of rapidly learning new technologies and processes, and successfully applying them to projects and operations.
