- Visualforce and lightning framework
- Lightning Web Components
- VS Code
- salesforce.com Force.com
- Effective Communication
- Problem-solving
- Teamwork

CERTIFICATIONS

- Salesforce Developer Jun2020
(TechnoBrilliant Learning Solution)

PROFESSIONAL EXPERIENCE

BrainTech Solution

Associate Salesforce Developer

Feb 2021

- Proficient in Salesforce Development utilizing Lightning Application, **Lightning Web Components, Apex Controllers, Triggers, Custom Objects**, and **integrations**.
- Hands-on proficiency in **Future Method, Scheduled Apex, Queueable Apex**, and **Batch Apex** for efficient asynchronous processing and bulk data operation.
- Hands on experience in Initiated queries using **SOQL** and **SOSL** in **Apex Classes** and **Triggers**.
- Used **SOQL & SOSL** considering the Governor Limits for data manipulation using the apex code.
- I have worked Cultivated multiple Lightning Web Components for enhanced Salesforce functionality then client satisfaction 20% .
- Making a data migration using **Data loader** and **Import Wizard**
- Extensive expertise in **Salesforce.com standard objects**, including **Accounts, Contacts, Opportunities, Leads, Reports**, and **Dashboards**.
- Hands on Experience in **deploying code via VS Code to GIT** for streamlined software delivery.
- Involved in Projects implemented based on Agile Methodology.
- Cultivated **Validation Rules, Rollup Summary** fields to meet business rules.
- Defined **Workflows** and set up **Workflow Rules**, Tasks and Email Alerts and created Workflow **Approvals**.
- Implemented custom styles using **CSS3**.
- Established **lightning components** with the help of **Salesforce lightning design system**.
- Hands-on proficiency in **Salesforce administrative** tasks including user management, Role creation, profile configuration, object **setup**, and **formula field creation**, I would be able to increase my work efficiency 20%.
- I had worked in 5 to 6 group my contribution as project member , I would be able to increase my work efficiency 30%

PROJECTS

Project: Vendor Management System

Role: Salesforce Admin +Salesforce Developements.

Responsibilities:

- Create custom objects aligned with unique business needs to enhance data management and workflow automation.
- Implemented Workflow Rules and Flow automation to streamline field updates and enhance process efficiency.
- Proficiently configured field-level validations, relationships, and lookups to maintain data integrity and enhance data management efficiency in Salesforce.
- Utilized Apex classes to manage server-side business logic and enhance functionality in Salesforce.
- Integrated triggers to automate processes and enforce complex validations, optimizing workflow.
- Enforced queries in SOQL to perform CRUD operations with the help of apex classes and triggers.
- Write queries in SOSL to fetch data from database.

Project: Product Management System

Role: Salesforce Developer

Responsibilities:

- Proficiently developed Triggers, Lightning Web Components (LWC), components, Apex Classes, and customizations to enhance Salesforce functionality.
- Engaged in end-to-end Salesforce administration, developement, and deployment, encompassing configuration changes, customizations, and deployment activities.
- Managed various activities within Salesforce.com, including Lightning Experience and the Lightning Component framework, to optimize platform usage and enhance user experience.
- Create and configured Workflows, Workflow Rules, Tasks, Email Alerts, and Workflow Approvals to automate business processes and streamline operations within Salesforce.
- Designed and developed Apex Classes, Controller Classes, extensions, Lightning Components, and Apex Triggers to address diverse functional requirements within the application's ecosystem.
- Successfully integrated Lightning Web Components to enhance functionality and usability within the Salesforce platform.
- Created custom UI using LWC.
- Proficient in developing Lightning Web Components using both Lightning components and HTML5 to create dynamic and interactive user interfaces.
- Implemented custom styles using CSS3 to enhance the visual appeal and user experience of Salesforce Lightning Web Components .
- Developed Lightning components leveraging Salesforce Lightning Design System (SLDS) to ensure consistent and intuitive user interfaces.
- Demonstrated hands-on experience with Lightning Data Service (LDS) for seamless CRUD operations within the Salesforce platform.
- Utilized SOQL and SOSL queries while adhering to Governor Limits for efficient data manipulation in Apex code within the Salesforce platform.
