PROFESSIONAL SUMMARY - BUSINESS ANALYST

Business Analyst with 4+ years of experience in designing and optimizing the business process. Strong academic background in business concepts, business research skills, and organizational behaviors critical for success in competitive environments. Knowledge of integration, API, strategies, and theories that lead to business process improvement. Able to analyze processes that influence the control and management of the organization. Looking forward to work in a reputed organization to expand my learnings, knowledge and skills.

EDUCATION

Bachelor in Technology - 7.99 CGPA,, ShriRam College of Engineering and Management	2017 - 2021
Higher secondary School - 86.80 % , Govt School of Excellence, No. 1	2016 - 2017
High School - 78.50 % , Govt School of Excellence, No. 1	2014 - 2015

SKILLS

Product Management: Documentation(BRD,FRD,SRS,RFI,RFC,RFP etc) | User Stories | Backlog Management | Product Strategy | Product Roadmap | Product Lifecycle Management | Market Strategy | Requirements Gathering | Stakeholder Management

Technical Skills: Data Analytics | A/B Testing | User Experience (UX) | Wireframing | Root Cause Analysis (RCA) | Market Research | Integrations | AWS S3 | Snowflake

Methodologies: Agile & Scrum | Design Thinking | Cross-functional Leadership | Process Optimization

Tools and Technologies: Figma | JIRA | Trello | Google Analytics | SQL | Microsoft Excel | Microsoft PowerPoint | Power BI | Mantis

EXPERIENCE

Business Analyst ANR Software Pvt Ltd	June 2021 - Present <i>Noida, India</i>
---	--

- **A software product-based company with major US based Clients (such as McDonald's,Pizza Hut,Taco Bell, Chipotle, etc.). Deals in designing and maintaining the business system with integration and modules.**
- Gathering requirements from the client for a new project enhancement request, encompassing both web and mobile applications.
- Planning and testing the deployment of the production release using the Agile methodology.
- Achieved program performance, usability, and scalability criteria by translating business requirements into high level conceptual designs, specifically building data flow designs and basic design models for development.
- Worked on integrations to meet client requirements.
- Worked on Engineering Change Requests (ECRs) and Statements of Work (SOW).
- Collaborated with key personnel in analyzing business request for feasibility and cost of the new projects.
- Worked on RCA(Root cause analysis) on P1/Escalation issues.
- Regular meetings with US-based clients, Solution consultants, and Internal teams to manage products and requests.

PROJECTS

1. AI Order Recommendation Engine - Created an AI-based automation system that recommends order quantities and vendor selections for restaurant stores based on past purchases, sales trends, and delivery performance. The system used predictive analytics and reinforcement learning to improve decision-making over time.

- Worked with development teams to enable real-time vendor selection automation through API triggers.
- Coordinated UAT sessions with US-based clients (Taco Bell and McDonald's franchisees) and gathered feedback for iterative improvement of recommendation accuracy.
- Provided support during the implementation phase.

2. AI-Powered Demand Forecasting System - Developed an AI-driven module to predict daily and weekly sales, helping restaurants optimize inventory and staffing levels. The system utilized historical sales, weather, holidays, and event data to forecast demand using machine learning models (Regression and Time Series)

- Helped design the process flow between POS data, Snowflake database, and the forecasting model.
- Organized client review and testing sessions to ensure accurate forecasts and practical use in operations.

3. RFID - A new system that allow client to accept food delivery from their vendor through RFID scanner which sending API packets to our system that loads the count of food product corresponds to their order. This system cut off the manual work currently stores are doing to accept food delivery.

- Prepared the functional and business requirement document, encompassing multiple changes in eRestaurantscreens and at the integration layer.
- Coordinated the development of polling cases based on issues reported by the client.
- Led the execution of cases involving reading, downloading, and deletion for polling. Conducted Knowledge Transfer (KT) sessions for various teams and clients.

4. Snowflake Integration - Snowflake Integration - Integrated Any Connector with Snowflake Data Warehouse to fetch Sales and Menu Mix data, and implemented automated realtime polling into the Altametrics Enterprise Application across 4000+ Chipotle restaurants.

- Coordinating the development of polling cases based on issues reported by the client.
- Leading efforts in handling cases related to reading, downloading, and polling of data.

5. Mobile Application - The mobile applications are integrated with the eRestaurant web application, allowing clients to easily access our products.

- Prepare various screens encompassing required functionalities, execute the Test Plan for GUI Testing and Functional Testing, conduct Functional, Technical, and Database Verifications, document the Functional document along with various guides, and perform Knowledge Transfer (KT) for various teams and clients.
- Mobile Apps: Altametrics Inventory, Altametrics Schedules and Altametrics Clock

AWARDS

- Awarded by the Chief Minister of Madhya Pradesh Mr Shivraj Singh Chauhan for the Academic performance and received Rs25000.
- Awarded as Employee of the Month in October 2022.

COURSES

- Business Analysis Foundations by Microsoft.
- Business Analysis and Process Management by Coursera.
